MONTHLY TABLES

I. Public Assistance Programs: Applications and Cases May, 1981 compared with selected earlier months 14-15

II. Minnesota Public Assistance Program: Recipients and Payments May, 1981 compared with selected earlier months 16

III. Aid to Families with Dependent Children: Cases, Children and Payments by County - May, 1981 17-18

IV. General Assistance: Cases, Recipients and Expenditures - May, 1981 19-20

V. Medical Assistance: Recipients Concurrently Receiving SSI, MSA or AFDC - May, 1981 21-22

VI. Medical Assistance: Recipients Receiving Medical Assistance Only - May, 1981 23-24

VII. Supplemental Security Income and Supplemental Aid by County - May, 1981 25-26

TECHNICAL NOTES 27

GLOSSARY 28

May, 1981 - In Summary

All Programs - Expenditures recorded a peak level in May at $87,645,420. The monthly increase of $9,668,520 was for higher medical allowances due primarily to retroactive rate adjustments for patients in nursing homes. Maintenance costs declined in May for General Assistance and AFDC recipients, but increased in Emergency Assistance (adjustments for utility costs) and Supplemental Aid recipients.

The previous peak in total expenditures was in December, 1980 when the total was $85,125,243. Each of the December and May total monthly expenditures convert to an annual rate of over one billion dollars.

Persons receiving assistance in May, 1981 was 232,204, 1,807 (-0.8%) below April but 21,227 (+10.1%) above May, 1980. The AFDC and GA maintenance programs account for both the monthly and annual trend.

Aid to Families with Dependent Children (AFDC) - For the first month since November, 1979, cases receiving payment reversed its uninterrupted climb and decreased 227 (0.4%) to 55,784. The largest decline occurred within the Unemployed Parent category, which dropped 117 cases, thus representing the first break in its upward trend which began September, 1979. The unemployed parent decline marks a sharp departure from the six-month period beginning with November, 1980 through April, 1981, in which cases increased an average of 230 per month. Statewide, the three urban counties were responsible for the overall case decline with 224 (0.8%) fewer cases. Paid cases within the rural and suburban counties remained stable with insignificant changes of -11 and a +8 respectively.

Net payments in May were $17,856,864, a slight decrease of $21,116 (0.1%). Payments changed relatively little despite fewer cases paid and an increase in IV-D collections of $141,041. The factor responsible for this phenomenon was a rise in foster institutional care costs of $238,726. These additional costs were incurred by Ramsey County for the payment of overdue bills (dating to July, 1979) which were unpaid due to computer problems.

A total of 3,402 applications were received in May, a decrease of 220 (6.1%) from April, 1981 and 134 (4.1%) higher than in May, 1980.

Approvals totalled 3,054, with reopenings surpassing new cases by 100 or 47.0% of the total.

Emergency Assistance (EA) - This program advanced during May in cases, recipients and payments. This is the fourth consecutive month of increase and is attributable to the growth of the AFDC component which rose to 1,106 families, an increase of 226 (25.7%). The non-AFDC segment by comparison was quite stable, advancing by only eight families, to 384.

Recipients totalled 5,107 in May, 814 (19.0%) above April's level and 662 (14.9%) more than one year ago. AFDC persons represented 72.7% of all recipients during May in contrast to one year ago when they represented 43.1%. Most of the recipient advance occurred in the urban counties, which increased by 760 (26.8%) to 3,595. Hennepin County alone added 561 recipients to reach 2,001, an increase of 39.0% over the previous month. Ramsey County also recorded increases, rising 252 recipients (21.6%) to 1,419. St. Louis County, however, declined by 53 recipients (23.2%) to total 175. The suburban and rural counties displayed only minute increases.

Monthly expenditures totalled $443,115. This is $96,818 (28.0%) ahead of April and $66,430 (17.6%) more than one year ago. Once again, the emergency of Utilities stood in the forefront, reaching $264,309 and representing 59.6% of all expenditures. High utility rates are not unusual during this time of year. However, the setting of two simultaneous records by this emergency is noteworthy since its typical peak is only one month in duration.

The majority of these emergencies (80.2%) occurred in the urban counties, with Hennepin alone accounting for 56.3% of the urban total and 45.1% of the state total. The majority of their April to May advance was on behalf of AFDC families whose utility needs reached $101,258.32 during May, an increase of $51,123.88 (102%) from the previous month. Ramsey County also recorded increased costs for these recipients, rising $35,819 (80.2%) to $80,473.44. St. Louis expended only $4,678 for AFDC families, $36 (0.85) less than April.

AFDC families in Hennepin and Ramsey Counties required assistance for utilities to a greater extent than did AFDC families in St. Louis County. This emergency during May involved 1.9% of the AFDC case load in Hennepin County, 2.5% in Ramsey County and 0.4% in St. Louis County. The balance of the state represented approximately 0.7% while statewide the utilization by this group was approximately 1.2%.

Eviction from shelter, the second most prevalent emergency, cost $71,342 in May. Hennepin County again experienced most of the costs, $49,530.00 (69.4%). Of this sum, $38,608 was for AFDC families. The degree of utilization by AFDC families is noteworthy in that it shows this problem as a Hennepin County phenomenon. Hennepin County's AFDC families represent 0.89% of the case load while Ramsey and St. Louis Counties are 0.06% and 0.05% respectively. The suburban and rural counties together represent approximately 0.16%. The reason for Hennepin County's high rate is unclear; however, administrative practice may be a factor.

Minnesota Supplemental Aid (MSA) - May was characterized by a decline in the number of MSA recipients. These recipients totalled 10,392, 73 (0.7%) fewer than April and 224 (2.1%) under one year ago. Expenditures by contrast failed to follow suit and advanced $26,120 (2.7%) to $977,151, a level $140,983 (16.9%) higher than May, 1980.

The average grant totalled $94.03 and represents the fifth continuous month of advance. The major factor behind this increase was the Aged category, which changed by $4.71 (6.8%) to average $74.04 per recipient during May. However, the Disabled category also increased, advancing by an average of $2.41 (2.4%) to $103.02.

The decline in case load during the month occurred in Dodge (-19), Hennepin (-11), Ramsey (-13), St. Louis (-3), and Waseca (-18) Counties. The change within the urban counties can be construed as normal fluctuation. The declines in the two rural counties, however, are due to their practice of making payments for clothing and personal needs at quarterly intervals, as in April.

Expenditures in May reached a record $977,151. Two factors can be identified as responsible for this advance. The primary factor was an increase in corrective payments in Hennepin ($16,516) and Washington Counties ($6,255) compared with April. These changes represented retroactive rate adjustments for nursing home recipients. However, the higher April refunds and cancellations in several counties (Cass +$6,734 and Ramsey +$15,943) also reduced the previous month's payment total and provided an additional margin for contrast.

General Assistance (GA)- The number of General Assistance recipients remained at a high level this May. Even though there was a 6.4% decline from April, the May 1981 total of 17,783 recipients is 29.2% above the average May total for the previous four years. Part of the high level of GA recipients may be attributed to economic conditions in Minnesota. The number of unemployed persons (an economic indicator) in the state is estimated at 106,800 this May, which is 17.6% above the May average for the previous four years. The larger relative increase in GA recipients appears to indicate that there is an increase in GA recipients which is not attributable to the higher unemployment. This nonunemployment-related pattern is also indicated by the fact that the correlation between GA recipients and unemployment has been lower in recent years than it was in the past.

The application activity shows the typical downward trend for this time of year. There were 11% fewer applications received in May than in April. Three thousand eight hundred and five (3,805) applications were approved and 4,368 cases were closed. Those changes result in fewer cases in the following month.

The emergency fuel assistance paid via GA for the 1980-81 heating season was $77,429.67. This money was paid for 472 cases in which there were 841 persons. ~~(Refer to the Emergency Fuel Assistance Table for county data.)~~ There were 171 recipients in the urban counties, 234 in the suburban counties and 436 in the rural counties.

Medical Assistance (MA) - The MA Program in May advanced in the numbers of persons served (+2.2%) and expenditures (+17.5%). Expenditures, totalling $65,507,257, were the highest ever recorded and the average expenditure per person, at $470.73, shared this distinction, too.

The recipient increase during the month was prompted by a greater utilization of the program by AFDC recipients. These increases involved 2,596 individuals and represented 86.4% of the monthly recipient change. May's recipient level of 139,162 was 16,606 (13.1%) higher than one year ago. Increased medical needs by AFDC recipients accounted for 14,230 (85.7%) of the annual change.

May's expenditure, at $65,507,257, was $9,768,591 (17.5%) above April and $18,735,649 (40.1%) greater than one year ago. Part of the change was attributable to retroactive rate adjustments in nursing homes. These adjustments totalled $3,114,931 in May, an increase of $1,061,104 (51.7%) from April.

During May, the recipient utilization was 60.3%. The following table outlines the utilization rates for the month and compares these rates with those of May, 1980.

Eligibility Category	Recipients	Eligibles	Utilization Rate May, 1981	Utilization Rate May, 1980
OAA-SSI	8,485	11,408	74.4%	72.1%

TOTAL	139,162	$ 65,506,922	$ 590,381,211

(1)This table represents state Medicaid system payments plus payments made by counties to primarily medical vendors not covered by the central payments system. Also, in this table, each person is counted under all service categories for which payment is made in his/her behalf during the month.

(2)Recipient recoveries represent collections such as estate settlements, tort recoveries, etc. ... generally third party collections which cannot be tied directly to a specific service billing. The dollar values under this category are always negative.

(3)An additional $24,332 was paid out for EPSDT services during the month; however, these charges were billed in a different fashion and are included under other service types such as Public Health Clinic, Physician/Osteopathic Services, etc. Existing reports do not break these charges out separately.

**Includes Lincoln, Lyon and Murray Counties.
***Includes Faribault, Martin and Watonwan Counties.

TECHNICAL NOTES

Table I	Application activity for the AFDC Program does not include applications for medical only needs.
Table II	Under MA, total Persons Concurrently Receiving AFDC are not included when calculating the total number of persons receiving assistance. This is done to unduplicate the total count since these people are already counted under the AFDC Program.
Table III	This table does not include cases and payments made under the Emergency Assistance Program.
Table IV	The sixteen (16) counties identified by the Census Bureau as metropolitan (i.e.; SMSA) are separated into urban and suburban. The urban counties are Hennepin, Ramsey, and St. Louis, and the suburban counties are the thirteen (13) other SMSA counties. These counties are noted (U) and (S) respectively. Two multi-county agencies are labelled as follows: F-M-W HSB includes Faribault, Martin, and Watonwan Counties; Region VIII North includes Lincoln, Lyon, and Murray Counties.
Tables V & VI	Medical Assistance - The program is broken into two components: (1) Those recipients who had a vendor payment made in their behalf and are not concurrently receiving a money payment (the MA-Only group). (2) Those recipients who are concurrently receiving a money payment (AFDC, SSI, MSA) and a medical vendor payment was also made in their behalf. The counts are of people in whose behalf a payment was made out of the State's Centralized Medical Payments System during the month specified.

GLOSSARY

AFDC-UB	AFDC UB . . . An unborn child is included under the definition of child in the AFDC Program and grants are determined accordingly. For this reason, we have counted them as recipients. It is possible for a case which is currently receiving money under another subprogram (such as Unemployed Father or Regular AFDC) to receive an additional amount due to the presence of an unborn child. In instances such as this, the unborn will appear in the child count, but there will be no case or caretaker count since they are carried under the other subprogram.
EPSDT	Early Periodic Screening and Diagnostic Treatment
GAMC	General Assistance Medical Care
HMO	Health Maintenance Organization
Nursing Home ICF-I	Intermediate Care Facility (High Care)
ICF-II	Intermediate Care Facility (Minimum Care)
ICF-MR	Intermediate Care Facility (Mentally Retarded)
OAA-CCR	Old Age Assistance Concurrently Receiving Supplemental Security Income
OAA-MAO	Old Age Assistance, Medical Assistance Only
P.T., O.T., S.T. Audiology in Nursing Home	Physical Therapy, Occupational Therapy, Speech Therapy
Podiatrist Service	Specializing in Foot Care Services
State Institution MR (ICF)	Mentally Retarded, Intermediate Care Facility
SMSA	Standard Metropolitan Statistical Area is a county or a group of contiguous counties which contain at least one city of 50,000 population. In addition to the county of counties containing such cities, contiguous counties are included in such areas if they are essentially metropolitan in character and are socially and economically integrated.

TECHNICAL NOTES 36

GLOSSARY 37

AFDC Unemployed Parents

This component of AFDC increased dramatically during fiscal year 1981. Cases averaged 3,671 monthly for the year and represent an advance of 1,960 cases (114.6%) from the previous fiscal year. Expenditures sustained an even higher rate of advance, reaching $19,375,081, an increase of $10,871,203 (127.8%) from fiscal year 1980.

The growth of the UP component is a recent occurrence. Until fiscal year 1980, costs for this did not exceed $7,000,000. This advance is shown below:

AFDC Unemployed Parents
Average Monthly Cases, Recipients and Total Payments
Fiscal Years 1975 to 1981 Compared

Fiscal Year	Cases	Recipients	Payments
1981	3,671	15,381	$19,375,081
1980	1,711	7,336	8,503,878
1979	1,299	5,597	6,136,727
1978	1,540	6,663	6,905,607
1977	1,627	7,129	6,933,074
1976	1,331	5,916	5,622,664
1975	937	4,257	3,576,287

The growth of the Unemployed Parent category of AFDC during fiscal year 1980 resulted from the economic downturn and its associated manifestations--diminished economic activity, layoffs, and higher unemployment. Many UP cases initially drew unemployment but after these benefits were exhausted, they had no alternative except to turn to public assistance.

The growth of the Unemployed Parent segment is not merely an urban phenomenon. It is occurring across the state. While the largest totals are still those of the urban counties, the suburban and rural counties are exhibiting a higher rate of growth. In only two years, the rural counties have grown from 21.4% of the total to 38.2%. Their case load growth during fiscal year 1981 was 178.8% compared to 121.3% for the suburban counties and 75.9% for the three urban counties.

The largest segment of Minnesota's population, 39.2%, reside in the urban counties, followed by the rural counties at 35.5% and the suburban counties at 25.3%.

The table below portrays the growth of the Unemployed Parent cases by type of county during 1981.

Change in AFDC Unemployed Parent
Average Monthly Cases by Area
Semiannually During Fiscal Year 1981

Type of County	July to December	January to June	Change #	Change %

June, 1981 - In Summary

All Programs - More medical claims were processed in June causing another increase in total expenditures, rising to a peak level of $88,723,949. This total was $1,078,529 (+1.2%) above May and $12,665,723 (+16.7%) over June, 1980. The monthly trend shows a decline in maintenance costs in AFDC and GA which partially offset the higher medical bill.

Persons aided were also at a peak at 237,271, 5,067 (+2.2%) above May and 18,755 (+8.6%) over June, 1980. Persons receiving medical only account for the monthly trend while the annual trend (as in previous months) represents persons receiving help with maintenance needs (AFDC added 13,076 persons over the year, while GA added 3,155).

Expenditures for fiscal year 1981 also recorded a peak of $914,554,795. Health care costs were up 16.1% in the past year while maintenance costs rose by 23.6%.

Type of Care	1980-1981 Expenditures	Change from 1979-1980	
		Amount	%
Maintenance	$256,739,821	+$ 49,051,101	+23.6%
Health Care (Only MA)	$657,814,974	+$ 91,446,053	+16.1%
Total	$914,554,795	+$140,497,154	+18.2%

The relative increase in total costs for F.Y. 1981 is down slightly from the previous year (which was +19.2%). Health care costs recorded a lower rate of increase, while the rate for maintenance care more than doubled.

Aid to Families with Dependent Children (AFDC) - The AFDC payment case load continued its downward movement begun in May, 1981. This marks the second month of decline, reversing the advance recorded since November, 1979. This decline is consistent with the normal trend for June. Payment cases for June decreased 263 (-0.5%) from May, 1981. The decreases occurred within the urban and rural counties, with an insignificant rise of 14 cases in the suburban counties. Only a minor change of -13 cases received payment in the urban counties whereas the rural counties dropped -264 (1.6%) cases. Declines in cases receiving payment occurred within 73.2% of the rural counties. Total case changes by segment are regular (-0.3%), unemployed parent (-2.7%), foster care in homes (+1.8%), foster care in institutions (-3.3%), unborn only (+1.1%) and unborn concurrent (+4.0%).

Expenditures were $17,098,677 for June, 1981, representing a decline from May of -$758,187 (-4.2%). Three factors contributing to the drop in costs are an increase of IV-D refunds of $446,080, an $82,000 reduction in costs as a result of fewer cases paid and decreasing institutional foster care in Ramsey County, which fell $233,699. (In May, Ramsey County issued back payments to July, 1979 for such care. Computer problems were deemed responsible.) June's payments were $292,034 (1.7%) less than the average monthly costs for fiscal year 1981. Compared with June, 1980, the current June's expenditures were $2,200,888 (14.8%) higher, which is attributable to an additional 5,046 cases paid and the 7.0% increase in the basic standard.

Applications approved in June totalled 3,185, of which 1,621 (50.9%) were reopened cases. Approvals increased 131 (4.3%) above May, 1981, and only three cases more than June, 1980. Total approvals for fiscal year 1981 were 42,339, or a monthly average of 3,528 cases. Of this total, 44.0% were reopened cases. Fiscal year 1981 approvals were 6,696 (18.8%) greater than in fiscal year 1980. Economic factors played a dominant role in 87.4% of the approvals. The two most prominent economic reasons were support being terminated or reduced as a responsible supporting family member continued to be absent from the home (57.5%), and loss or reduction of employment due to layoff, discharge or by client's own initiative (15.9%). The 42,339 approved cases contained 83,927 children. The following table displays the status of the absent parent by rank order for the children of approved cases:

Status	Number of Children	% of Total
Divorced or legally separated	19,240	22.9%
Not married to mother	16,709	19.9%
Separated without court decree	16,644	19.8%
Unemployed father	13,418	16.0%
Unknown	5,479	6.5%
In home, not incapacitated	3,380	4.0%
Incapacitated (physically or mentally)	3,179	3.8%
Absent for reason not mentioned	1,847	2.2%
Child deprived of mother's care, not father's	1,539	1.8%
Death	1,493	1.8%
Imprisoned	467	0.6%
Desertion	413	0.5%
In military service	119	0.1%
Total	83,927	100.0%

June closings numbered 8,997, an unprecedented rise of 5,691 (172.1%) cases above May, 1981. A large portion of these closings were stepparent cases which were removed in accordance with a new state stepparent law. This law becomes effective July 1, 1981, and states that stepparents living in the home of their stepchildren have the same status as natural or adoptive parents in terms of parent responsibilities for support or care; and the stepparent terminations shall be effected in sufficient time to prevent issuance of July grants. For every case closed in June, there were 0.35 cases opened. Total cases closed in fiscal year 1981 equalled 42,368, producing a monthly average of 3,531 cases. Closings were 9,771 (30.0%) higher than in fiscal year 1980.

Fiscal Year 1981

AFDC expenditures for the fiscal year ending June 30, 1981 were $208,688,533, or $35,488,312 (20.5%) higher than in fiscal year 1980. It should be noted that this trend represents the 7.0% increase in the basic standard on July 1, 1980, and the rise in the average number of cases receiving payment per month from 48,808 to 54,142. The average grant per family rose $25.48 (8.6%), from $295.72 to $321.20. The fastest growing segment of the program was the unemployed parent. From July, 1980 through April, 1981, this segment soared from 2,770 cases to 4,530, an increase of 63.5%. May and June reflected a slight downward trend.

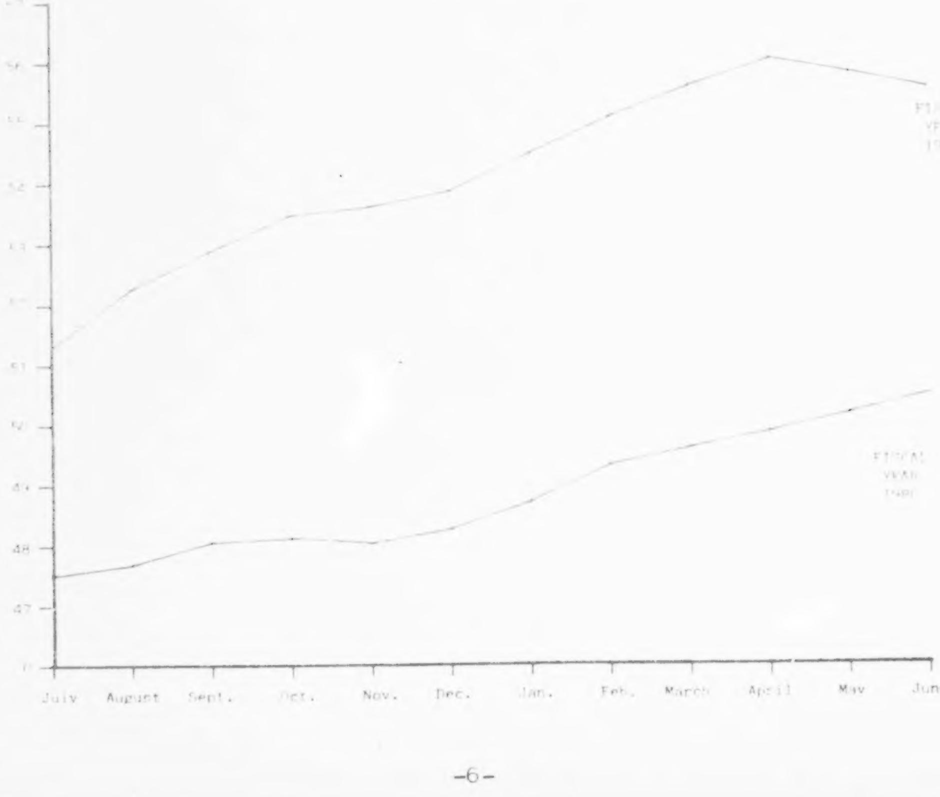
In fiscal year 1981, support collections received totalled $18,387,866, a rise of $2,668,878 (17.0%) above such collections for fiscal year 1980. Support collections represented 8.1% of the total AFDC maintenance costs compared to 8.3% in fiscal year 1980.

Payments to 18 year olds during the current fiscal year totalled $1,435,062, averaging $119,588 per month, up $15,184 (14.5%). The number of 18 year olds receiving payment averaged 1,048 monthly. The average monthly grant per person was $114.11.

Over the 12-month period of fiscal year 1981, a monthly average of 191 families received emergency fuel assistance. Costs for such assistance totalled $500,372. The average amount received per family was $218.03. Twelve (12) rural counties made no payments for emergency fuel.

The annual trend in the AFDC payment case load over the current fiscal year shows a 10.9% increase in families, a rise of 11.3% in total persons, an 8.9% increase in children and a 16.2% increase in caretakers. The percentage increase in caretakers surpassed that of cases and children due to the rapid expansion of the unemployed parent segment and the increasing number of unwed mothers which produced the effect of lowering the average number of children per family. In terms of the annual increase in total persons (14,943), 6,982 represent caretakers and 7,961 children.

AFDC
Cases Receiving Payment by Month
Fiscal Years 1980 and 1981



Emergency Assistance (EA) - June EA was marked by lower utilization and lower costs. This was caused by a lessening of the number of applicants attempting to clear up overdue utility bills.

There were 4,602 recipients during June. This was 505 (9.9%) below May and 450 fewer than one year ago. In the past year, a shift in the composition of the AFDC case load has occurred. AFDC recipients numbered 3,077 in June and represented 66.9% of the total, whereas one year ago, they accounted for 51.7%.

Cases numbered 1,319 for the month, 163 (11.0%) fewer than May and 125 (8.7%) below one year ago.

June's expenditure totalled $363,796. This represents a decline of $79,317 (17.9%) from May and is $7,248 (2.0%) less than recorded last year.

The three emergencies sustaining the greatest change were Eviction from Shelter, Migrant Family in Need, and Utilities. An increase in the number of migrant families is a typical occurrence in June. These emergencies are shown in the table below.

Month	Eviction from Shelter	Migrant Family in Need	Utilities
June, 1981	91,740	21,113	151,230
May, 1981	71,342	6,977	264,309
Change	+20,398	+14,136	-113,079
Percent of Change	+ 28.6%	+202.6%	- 42.8%

During the 1980-1981 heating season, $134,302 was spent for fuel by the county agencies. This represents 3.0% of the EA payments during fiscal year 1981. By contrast, fuel payments in fiscal year 1980 (October - June) totalled $71,199 and represented 9.4% of total expenditures. The Emergency Fuel category is shown below for the period October, 1980 - June, 1981.

Emergency Fuel Assistance
October, 1980 - June, 1981

Month	Families	Persons	Payments
October, 1980	70	261	$ 15,070
November	106	412	22,143
December	103	415	22,892
January, 1981	68	265	14,109
February	80	295	18,593
March	77	282	19,804
April	75	312	17,417
May	16	61	4,100
June, 1981	2	6	$ 174
Total	597	2,309	$134,302

The Emergency Assistance Program recorded increases during fiscal year 1981. The number of persons grew by 7.7% while cases advanced by 8.6% and expenditures by 11.9%. One factor behind this change was the growing number of AFDC families who required additional assistance. Their numbers grew from an average of 703 per month in fiscal year 1980 to 953 per month in fiscal year 1981. AFDC families, because of their smaller size, should have had a greater effect on the number of cases than on the number of persons. Yet, AFDC persons advanced at the rate of 36.9%. This would suggest that a number of the larger AFDC families required some form of additional assistance during 1981.

Cases averaged 1,401 per month during the year, 111 (8.6%) more than fiscal year 1980. The urban counties were the foci of this advance, sparked by Hennepin and Ramsey Counties, who alone advanced by 146 cases or 17.7%.

Fiscal year 1981 expenditures reached $4,431,695, an increase of $470,277 (11.9%) from fiscal year 1980. Costs incurred in the urban counties at $3,134,052 represented 70.7% of the state total. This was $631,037 (25.2%) higher than fiscal year 1980. The suburban counties remained virtually unchanged, advancing only $10,473 (1.8%) to $586,763 while the rural counties presented a marked contrast by registering a decline of $171,233 (19.4%) to $710,880.

The emergencies of Eviction, No Employment, Utilities and Emergency Fuel together accounted for $450,883 (95.9%) of the fiscal year 1980 to 1981 advance. The major categories of change were Eviction up $303,581 (30.3%) to $1,305,021, No Employment down $187,296 (42.0%) to $258,778, Utilities up $520,319 (72.0%) to $1,242,548, and Emergency Fuel down $185,721 (56.7%) to $141,567.

The average monthly payment per case was $263.51 in fiscal year 1981, $7.62 (3.0%) more than in fiscal year 1980. The average number of persons per family remained at 3.4. All counties reported payments for EA in fiscal year 1981.

Minnesota Supplemental Aid (MSA) - In June, 10,337 aged, blind and disabled persons received assistance. This is 55 (0.5%) fewer than May and 256 (2.4%) under one year ago. The May to June change resulted from a decline in the Aged category, whose numbers fell by 64 (2.1%) to 3,018. This, however, was partially offset by slight advances in the number of blind, up one to 162, and disabled, up eight to 7,156 recipients.

Expenditures totalled $996,107 during the month, $18,956 (1.9%) higher than May and $110,644 (12.5%) above June, 1980. The June increase occurred within the Blind and Disabled categories, whose expenditures rose $3,737 (29.8%) and $17,436 (2.4%) respectively. Two counties contributed to higher costs for the blind. Hennepin County's expenditure rose $2,043 (35.0%) to $7,875, while St. Louis County reported an increase of $614 (73.3%) to $1,450. For St. Louis County, the increase reflected retroactive adjustments for board and care recipients. Very likely, Hennepin County's advance represented this as well.

The average grant for the month, at $96.36, represents a new record. It was bolstered by the advance in payments for blind recipients, but resulted primarily from the advance within the Disabled category, which grew by $2.33 (2.3%) per case (person).

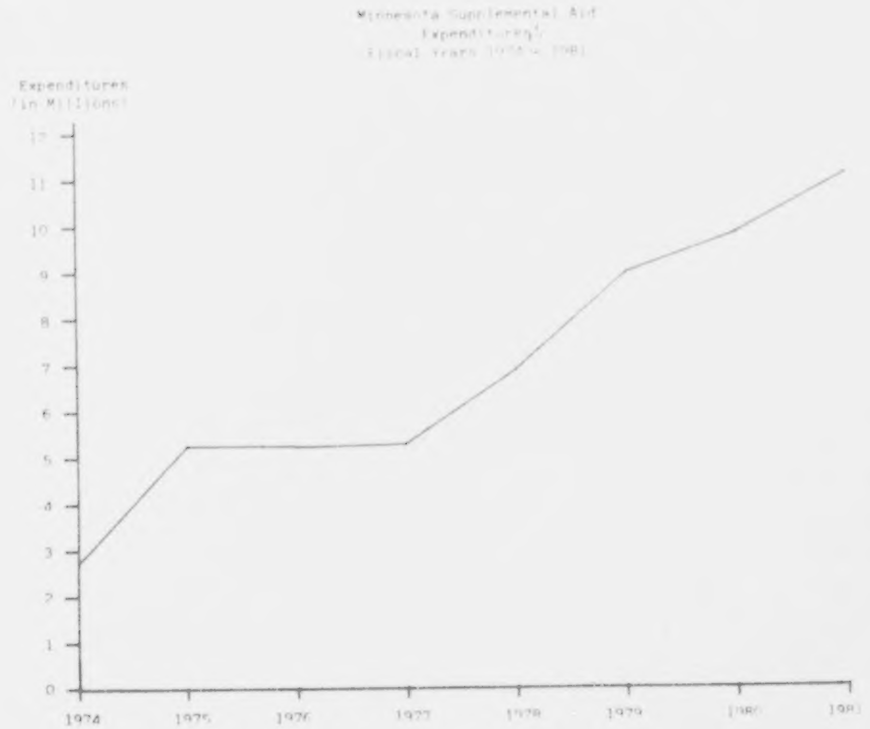
Cases averaged 10,421 per month during fiscal year 1981. This was 295 (2.8%) fewer than recorded last year. Declining cases, coupled with rising costs, bolstered the average monthly grant causing it to advance 16.2% from fiscal year 1980.

The expenditure for fiscal year 1981 totalled $11,082,771. The growth of fiscal year expenditures since the implementation of the MSA Program has been persistent, as noted in the table below and in the graph which follows.

Minnesota Supplemental Aid
Changes in Expenditures and Monthly Grants
Fiscal Years 1974 - 1981

Fiscal Year	Fiscal Expenditure	% of Change	Average Monthly Grant Per Person	% of Change
1974 (½ year)	$ 2,709,366		$44.21	
1975	5,252,641	-3.1%*	50.42	14.0%
1976	5,222,438	-0.6%	62.54	24.0%
1977	5,285,057	1.2%	77.58	24.0%
1978	6,871,337	30.0%	53.58	-30.9%
1979	8,951,944	30.3%	68.22	27.3%
1980	9,808,386	9.6%	76.28	11.8%
1981	$11,082,771	13.0%	$88.62	16.2%

*1974 expanded for comparison purposes.



General Assistance (GA) - June is the last month before the changes in the GA statute take effect. The June statistics already show signs of the expected July GA decrease resulting from the legislated eligibility limitations. The number of eligible cases continued to July from June were nearly one-third less than those continued to June from May. There were 13,740 eligible cases continued to June from May but 9,313 continued to July from June. The 4,427 drop in continued eligible cases was largely an urban change. There were decreases of 2,653 in Hennepin County, 1,003 in Ramsey and St. Louis combined, and 771 in the remainder of the state.

The reduction in the number of eligible cases continued to the following month was the result of a large number of case closings. Statewide, there were 8,879 cases closed and 4,452 cases approved. In Hennepin County, there were 5,027 cases closed and 2,374 cases approved. The reasons for closing, as reported in the Welfare Information System, show no clear connection with the new program changes even though these changes must be the cause. There were two reasons for closing which accounted for most of the increase: "Refused to cooperate with the Work Relief Program requirements" and "Refused or failed to furnish current information relating to eligibility." These reasons may be interpreted to indicate that cases were closed due to more stringent eligibility requirements in light of the fact that more appropriate reason categories are not available in the reporting system.

The average grant (gross dollars) per person was $160.20 in June. This is 0.4% less than May and 19.3% more than June 1980. The 4,452 cases added in June brought the total eligible cases to 18,192. In June, 17,675 persons in 15,804 cases received assistance. The number of recipient persons was 0.6% less than May and 21.7% more than June, 1980.

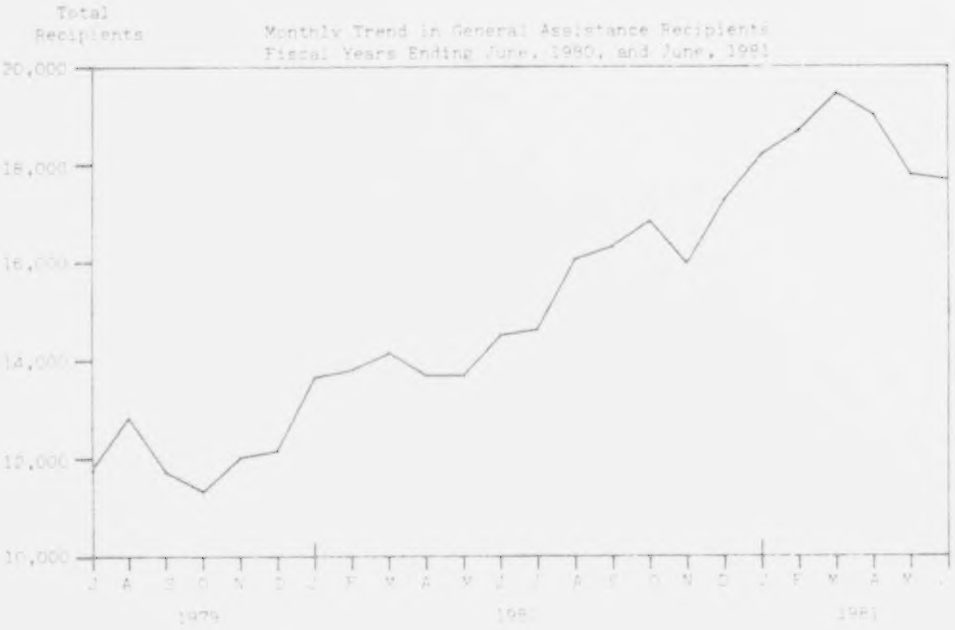
The month of June brings to an end fiscal year 1981. Gross expenditures during the fiscal year totalled $32,536,488 (compared to $20,718,696 during fiscal year 1980). The gross payments are reduced somewhat by various adjustments to the net payments as follows:

Net General Assistance Payments

	State Payments	County Payments	Total
F.Y. 1980	$ 9,340,764	$9,140,226	$18,480,990
F.Y. 1981	$18,265,637	$8,630,427	$26,896,064

There are two reasons why the state is bearing a substantially greater portion of the cost. First, fewer counties are currently making payments in excess of the state standards. The state GA standards impose a maximum payment per case above which the state will not reimburse counties. Due to tight local money, several counties which formerly had payment standards greater than the state standards have opted against keeping their standards greater than the state's. The result is that many local payment standards have been overtaken as increases were made in the state standards. Secondly, the state increased its reimbursement rate from 50% to 60% on January 1, 1980, and from 60% to 75% on January 1, 1981. Thus, more of payments in fiscal year 1980 were made with state reimbursement and these payments were reimbursed at a higher rate.

The average number of recipients per month increased from 12,953 in fiscal year 1980 to 17,330 in fiscal year 1981 and the average payment per person increased from $133.29 to $156.45. The payment per person has barely if at all kept pace with cost of living increases, so the real increase in cost results from increasing numbers of recipients.



Monthly Trend in General Assistance Recipients
Fiscal Years Ending June, 1980, and June, 1981

The typical seasonal trend in recipient counts is for a high in February and March and a low in June and July. With the onset of economic stress, the highest number of recipients in fiscal year 1980 occurred in June 1980. As the graph above shows, each month in fiscal year 1981 had a higher number of recipients than did June 1980.

Medical Assistance (MA) - Recipients during June totalled 161,292, an increase of 22,130 (15.9%) from May and 19,698 (13.9%) more than one year ago. The June advance was caused by a higher utilization by AFDC recipients whose numbers increased 15,578 (19.9%) from the May level. These recipients also contributed to the annual change representing 16,922 (85.9%) of the advance. The utilization of services was 2.11 per recipient compared to 2.08 in May and 2.44 one year ago.

June's expenditures reached $67,433,763, resulting in an average of $481.08 per person, the highest monthly average recorded in fiscal year 1981. This program was $1,078,529 (1.2%) above May, a record month, and $12,665,723 (16.7%) above one year ago.

The expenditure for fiscal year 1981 totalled $657,814,977, with an average monthly recipient count of 135,472. The following table shows the growth of expenditures since 1975.

Fiscal Year	Total Expenditure	% of Change
1981	$657,469,720	16.1%
1980	566,368,921	22.7%
1979	461,615,020	13.3%
1978	407,486,537	10.8%
1977	367,624,575	14.3%
1976	321,575,493	23.1%
1975	261,226,844	14.9%

Long-term medical care accounted for $429,773,058 (65.3%) of the total expenditure for fiscal year 1981. This expenditure was incurred by an average of 33,941 recipients per month during the year. Since 147,272 recipients utilized medical services for an average month during fiscal year 1981, long-term care involved only 23.0% of the recipients incurring 61.2% of the costs.

Recipients of long-term care facilities also incurred additional costs that totalled $44,631,195 in fiscal year 1981. This was for ancillary services which were not included in the normal day-to-day care of long-term facilities. For an average month during fiscal year 1981, 28,734 or 84.7% of these recipients utilized ancillary services.

Therefore, 23.0% of the monthly recipient total incurred $474,404,253 or 72.1% of the total MA expenditures for fiscal year 1981. This long-term medical care averaged $1,164.78 per monthly recipient during the year.

The pattern of expenditures for fiscal year 1981 and 1980 is shown on the following page.

TOTAL	161,292	$67,433,763	$657,814,974

(1)This table represents state Medicaid system payments plus payments made by counties to primarily medical vendors not covered by the central payments system. Also, in this table, each person is counted under all service categories for which payment is made in his/her behalf during the month.

(2)Recipient recoveries represent collections such as estate settlements, tort recoveries, etc. ... generally third party collections which cannot be tied directly to a specific service billing. The dollar values under this category are always negative.

(3)An additional $30,624 was paid out for EPSDT services during the month; however, these charges were billed in a different fashion and are included under other service types such as Public Health Clinic, Physician/Osteopathic Services, etc. Existing reports do not break these charges out separately.

***Includes Faribault, Martin and Watonwan Counties.

TECHNICAL NOTES

Table I — Application activity for the AFDC Program does not include applications for medical only needs.

Table II — Under MA, total Persons Concurrently Receiving AFDC are not included when calculating the total number of persons receiving assistance. This is done to unduplicate the total count since these people are already counted under the AFDC Program.

Table III — This table does not include cases and payments made under the Emergency Assistance Program.

Table IV — The sixteen (16) counties identified by the Census Bureau as metropolitan (i.e.: SMSA) are separated into urban and suburban. The urban counties are Hennepin, Ramsey, and St. Louis, and the suburban counties are the thirteen (13) other SMSA counties. These counties are noted (U) and (S) respectively.

Two multi-county agencies are labelled as follows: F-M-W HSB includes Faribault, Martin, and Watonwan Counties; Region VIII North includes Lincoln, Lyon, and Murray Counties.

Tables V & VI — Medical Assistance - The program is broken into two components:

(1) Those recipients who had a vendor payment made in their behalf and are not concurrently receiving a money payment (the MA-Only group).

(2) Those recipients who are concurrently receiving a money payment (AFDC, SSI, MSA) and a medical vendor payment was also made in their behalf.

The counts are of people in whose behalf a payment was made out of the State's Centralized Medical Payments System during the month specified.

GLOSSARY

AFDC-UB	AFDC UB . . . An unborn child is included under the definition of child in the AFDC Program and grants are determined accordingly. For this reason, we have counted them as recipients. It is possible for a case which is currently receiving money under another subprogram (such as Unemployed Father or Regular AFDC) to receive an additional amount due to the presence of an unborn child. In instances such as this, the unborn will appear in the child count, but there will be no case or caretaker count since they are carried under the other subprogram.
EPSDT	Early Periodic Screening and Diagnostic Treatment
GAMC	General Assistance Medical Care
HMO	Health Maintenance Organization
Nursing Home ICF-I	Intermediate Care Facility (High Care)
ICF-II	Intermediate Care Facility (Minimum Care)
ICF-MR	Intermediate Care Facility (Mentally Retarded)
OAA-CSS	Old Age Assistance Concurrently Receiving Supplemental Security Income
OAA-MAO	Old Age Assistance, Medical Assistance Only
P.T., O.T., S.T. Audiology in Nursing Home	Physical Therapy, Occupational Therapy, Speech Therapy
Podiatrist Service	Specializing in Foot Care Services
State Institution MR (ICF)	Mentally Retarded, Intermediate Care Facility
SMSA	Standard Metropolitan Statistical Area is a county or a group of contiguous counties which contain at least one city of 50,000 population. In addition to the county of counties containing such cities, contiguous counties are included in such areas if they are essentially metropolitan in character and are socially and economically integrated.

TECHNICAL NOTES 27

GLOSSARY 28

July, 1981 - In Summary

All Programs - Persons aided in July, 1981 totalled 221,302, a decline of 15,969 (-6.7%) from the previous month. Most (59.6%) of this trend represents persons receiving only medical care, as fewer medical claims were processed in July. Another 36.0% represents the termination of "employable" persons from the General Assistance program, as GA eligibility was restricted by the 1981 Legislature. Also contributing to the decline was the transfer of AFDC-Foster Care children from the Income Maintenance programs (AFDC) to Social Services (July 1, 1981).

The persons who were terminated from GA eligibility were from all age groups with most in the under 35 category. Also, there were more males than females that lost eligibility.

July expenditures were down $17,798,620 (-20.1%) as a result of the fewer medical claims processed. This included the absence of high cost claims for the cost of care of patients in state facilities for the mentally retarded and mentally ill. The AFDC program was the only program recording higher costs, as the higher standard (+7%) became effective July 1, 1981.

The annual trend in persons and expenditures shows more persons aided, accounted for primarily by persons in AFDC families, and slightly lower expenditures, accounted for by the lower medical bill this year.

Aid to Families with Dependent Children (AFDC) - Despite the removal of foster care from AFDC, maintenance payments for July rose to $18,180,900, surpassing such costs for June, 1981 by $1,082,224 (6.3%). Factors contributing to increased costs were a 7.0% rise in the basic standard, effective July 1, and a decline in IV-D collections of $422,154. In comparison with July, 1980, expenditures were 9.0% greater, thereby reflecting an increase of 0.75% per month throughout this 12-month period. Beginning with July, 1981, data on foster care payments, cases and children are excluded from the AFDC program reporting since this category is now the responsibility of the Social Service Bureau. Also, foster care approvals, closings and denials will not be included in the totals for Table I.

Cases receiving payment continued to drop for the third month in succession. Paid cases in July were 1,501 (2.7%) fewer than in the previous month. This is contrary to past experience for cases typically increase during July. The reduction is attributable to the elimination of foster care which accounted for nearly 90% of the monthly change. The remaining 10% represented stepparent cases which were terminated during June. Although an injunction stayed this implementation of the stepparent law, time was insufficient to reinstate all these cases. As a result, such cases will appear on the August payroll and will receive a retroactive grant for July. According to the case information file, 5,554 cases were closed in June because of stepparent situations. Of these, 2,737 were due to a stepparent accepting full responsibility for the child and 2,817 because the child was no longer deprived of parental support. Normally these two reasons pertain to approximately 220 cases per month. In July, 4,519 cases were reopened as a result of a change in state law or assistance program policy compared to a monthly average of five cases. Cases opened in July for economic reasons were 402 (15.2%) greater than June. Total openings reported for July reached 7,963, of which 6,186 (77.7%) were reopened cases. Generally, reopened cases comprise 44% to 50% of the total approved cases each month. Closings numbered 6,378. For every case closed, there were 1.25 cases opened.

Unemployed parents, following two months of decline, reversed its downward trend and climbed to 4,489 paid cases or 195 (4.5%) above June, 1981. Percentagewise, the rural counties increased 5.9% and the SMSA counties 3.7%. In contrast, the regular cases dipped 602 (1.2%), a reflection of the effect of the stepparent law. Paid cases for unemployed parents in the current month were 1,719 (62.1%) higher than in July, 1980. The unborn segments changes were insignificant.

It is anticipated cases and costs will rise in August as a result of the policy changes discussed above.

Emergency Assistance (EA) - Expenditures for Emergency Assistance remained relatively stable, declining only $3,655 (1.0%) below June, 1981. In contrast, costs were $80,365 (18.2%) less than in July, 1980. Over the 12-month period, beginning with August, 1980 and continuing through July, 1981, payments averaged $362,611 per month. Utilities and eviction were the two most significant causal factors encompassing $273,685 (76.0%) of the total outlay. These two emergencies are obviously more prevalent within the more heavily populated counties, consuming 81.0% of urban and 80.4% of suburban county costs, compared with 39.4% for the rural counties. No Employment was the predominant emergency for families within the rural counties. AFDC families received 65.4% of the expended monies.

Cases rose to 1,371, an increment of 52 (3.9%) above June and 336 (19.7%) below July, 1980. The AFDC cases represented 69.4% of the total cases. A preponderance of the AFDC cases receiving EA (83.8%) resided in the urban counties. Of the total cases receiving EA within the urban counties, four out of five were AFDC cases. This ratio changes to one out of three for suburban counties and two out of five for the rural counties.

Families other than AFDC received a total of $124,723 of which $87,442 (70.1%) was disbursed for utilities and eviction. Within the emergency categories of Utilities and Evictions, AFDC cases incurred costs of $186,243 or 79.1% of the total expenditure. Two other prominent factors contributing to emergency assistance for "other families" was unemployment and migrancy which together accounted for 18.7% of all their costs. All other types of emergencies played a minor role as contributors to need.

Minnesota Supplemental Aid (MSA) - July was characterized by fewer recipients and lower costs. Recipients totalling 10,292 were 45 (0.4%) below the previous month and 168 (1.6%) fewer than one year ago. Expenditures during July reached $952,698. This is $43,409 (4.4%) less than June, a record month but in retrospect is $20,660 (2.2%) more than July, 1980.

The average grant for the month was $92.57, $3.79 (3.9%) below June. This decline occurred in all recipient categories with the aged, blind and disabled falling $2.95 (3.9%), $13.49 (13.5%), and $3.86 (3.7%) respectively.

The urban counties were the major contributors to the payment decline. They accounted for approximately two-thirds of the expenditure change across the three categories. The greatest dollar change was the $30,109.17 decline recorded within the disabled category. This represented 92.7% of the monthly disabled decrease. The urban counties sustained a $5,079 decline within the aged category and accounted for 60.5% of the dollar change occurring there.

The urban counties also recorded a decline within the blind segment. This totalled $2,209 and represented 80.5% of the change experienced. A number of factors were responsible for these changes. They were lower payments resulting from new (initial) cases, corrections, and special needs in addition to higher refunds and cancellations.

General Assistance (GA) - The number of applications processed in July 1981 was 3,963. Of these 3,131 (79.0%) were approved. This number approved is 29.7% less than the figure for June. The total number of persons receiving GA for July, 1981, was 11,934. This was 5,741 (32.5%) less than June, 1981 and 2,710 (18.5%) less than July, 1980. The average grant (gross dollars) per person for July, 1981, was $172.16. This was $11.96 (7.5%) more than June, 1981, and $36.12 (26.6%) more than July, 1980.

All of the above statistics give indication of the changes resulting from the changes in the GA Program. In addition to the conventional financial tests for GA eligibility, a recipient must now meet the requirements in one of eight eligibility categories, unless the local county takes total financial responsibility for the assistance payment. In abbreviated form, the eight categories are as follows. A recipient must be a person who:

(a) is suffering from illness, injury, or incapacity;
(b) is needed in the home to care for another family member;
(c) has been placed in a physical or mental health or rehabilitation facility;
(d) resides in a battered women's shelter;
(e) is a displaced homemaker;
(f) is unable to secure suitable employment due to a lack of English language skill;
(g) is not in (a) or (c) above, and whose mental illness prevents suitable employment; or
(h) is unable to secure suitable employment due to a lack of marketable job skills.

The category (h) eligibility is limited to five weeks per calendar year, but experience indicates that some persons, who were eligible according to (h), have later documented other eligibility, and thus continue receiving assistance.

The total impact of the program changes will not be evident until late in 1981, but already in July some impact is manifest. In July there were 12,444 cases eligible, which is 31.6% below June's figure. There were 8,654 eligible cases continued to August, which is 7.1% below the number continued to July. The average grant per person was $160.20 in June and $172.16 in July.

Medical Assistance (MA) - July marked the return to a typical two warrant (payment) cycle period. As a consequence, both recipient numbers and expenditures diminished.

Recipients numbered 124,143 in July and represented a reduction of 37,149 (23.0%) from the previous month and 5,687 (4.4%) higher than one year ago.

The decline in AFDC utilization alone totalled 27,628 recipients and accounted for 74.4% of recipient change.

July's expenditure, at $49,377,081, was $18,056,682 (26.8%) less than June and $2,305,851 (4.5%) under one year ago. This was influenced by the absence of state institutional payments, whose payments fell from $6,067,830 in June to $176,253 in July. Lower AFDC utilization had no significant effect on expenditures since these fell by only $238,731 (3.6%).

1)This table represents state Medicaid system payments plus payments made by counties to primarily medical vendors not covered by the central payments system. Also, in this table, each person is counted under all service categories for which payment is made in his/her behalf during the month.

2)Recipient recoveries represent collections such as estate settlements, tort recoveries, etc. ... generally third party collections which cannot be tied directly to a specific service billing. The dollar values under this category are always negative.

3)An additional $5,875 was paid out for EPSDT services during the month; however, these charges were billed in a different fashion and are included under other service types such as Public Health Clinic, Physician/Osteopathic Services, etc. Existing reports do not break these charges out separately.

---

*May not add due to rounding.

**Includes Lincoln, Lyon and Murray Counties.

***Includes Faribault, Martin and Watonwan Counties.

TECHNICAL NOTES

Table I	Application activity for the AFDC Program does not include applications for medical only needs.
Table II	Under MA, total Persons Concurrently Receiving AFDC are not included when calculating the total number of persons receiving assistance. This is done to unduplicate the total count since these people are already counted under the AFDC Program.
Table III	This table does not include cases and payments made under the Emergency Assistance Program.
Table IV	The sixteen (16) counties identified by the Census Bureau as metropolitan (i.e.; SMSA) are separated into urban and suburban. The urban counties are Hennepin, Ramsey, and St. Louis, and the suburban counties are the thirteen (13) other SMSA counties. These counties are noted (U) and (S) respectively. Two multi-county agencies are labelled as follows: F-M-W HSB includes Faribault, Martin, and Watonwan Counties; Region VIII North includes Lincoln, Lyon, and Murray Counties.
Tables V & VI	Medical Assistance - The program is broken into two components: (1) Those recipients who had a vendor payment made in their behalf and are not concurrently receiving a money payment (the MA-Only group). (2) Those recipients who are concurrently receiving a money payment (AFDC, SSI, MSA) and a medical vendor payment was also made in their behalf. The counts are of people in whose behalf a payment was made out of the State's Centralized Medical Payments System during the month specified.

GLOSSARY

AFDC-UB	AFDC UB . . . An unborn child is included under the definition of child in the AFDC Program and grants are determined accordingly. For this reason, we have counted them as recipients. It is possible for a case which is currently receiving money under another subprogram (such as Unemployed Father or Regular AFDC) to receive an additional amount due to the presence of an unborn child. In instances such as this, the unborn will appear in the child count, but there will be no case or caretaker count since they are carried under the other subprogram.
EPSDT	Early Periodic Screening and Diagnostic Treatment
GAMC	General Assistance Medical Care
HMO	Health Maintenance Organization
Nursing Home ICF-I	Intermediate Care Facility (High Care)
ICF-II	Intermediate Care Facility (Minimum Care)
ICF-MR	Intermediate Care Facility (Mentally Retarded)
OAA-CCR	Old Age Assistance Concurrently Receiving Supplemental Security Income
OAA-MAO	Old Age Assistance, Medical Assistance Only
P.T., O.T., S.T. Audiology in Nursing Home	Physical Therapy, Occupational Therapy, Speech Therapy
Podiatrist Service	Specializing in Foot Care Services
State Institution MR (ICF)	Mentally Retarded, Intermediate Care Facility
SMSA	Standard Metropolitan Statistical Area is a county or a group of contiguous counties which contain at least one city of 50,000 population. In addition to the county of counties containing such cities, contiguous counties are included in such areas if they are essentially metropolitan in character and are socially and economically integrated.
TB	Tuberculosis

TECHNICAL NOTES 28

GLOSSARY 29

August, 1981 - In Summary

All Programs - The processing of medical claims for patients in state facilities for the mentally retarded and mentally ill was resumed in August, and this was the primary factor in the rise in total persons aided and total expenditures. The 223,889 persons aided in August was 2,587 (+1.2%) above July while expenditures rose $4,761,575 (+6.7%). The higher rate for expenditures reflects the addition of the high cost cases in the state residential facilities.

In the maintenance programs, mixed trends occurred with AFDC continuing to show more families aided reflecting rising unemployment, while the General Assistance Program continued to record decreases reflecting restriction in eligibility (employable persons no longer eligible for assistance).

The annual trend in total persons and costs shows a rise of 2,356 (+1.1%) in persons aided and $3,598,310 (+5.0%) in expenditures. The AFDC Program accounts for the trend in persons, while higher medical costs account primarily for the expenditure trend.

Aid to Families with Dependent Children (AFDC) - In August, cases receiving assistance rose 429 (0.8%) in response to increases within the regular (0.8%) and unemployed parent (2.5%) segments. Two factors contributed to the case rise. The first is the deepening economic recession which has created above average numbers of unemployed parent cases. The second originates from the reversal of the state directive to disallow payments to cases involving stepparents. These cases were terminated on July 1 but reinstated later in the month by court order. Since this reinstatement occurred at "the 12th hour", not all these cases were reinstated in July but were carried over to the current month.

Net payments reached $18,278,801 and represent the highest monthly Minnesota expenditure ever reported for AFDC. Child support (Title IV-D) recoveries totalled $1,868,843 and represents an increase of $89,448 (5.1%) from July. The recoveries represented 9.0% of the total (gross) maintenance needs (net costs plus support collections) during the month.

Applications approved totalled 7,033, down 930 (11.7%) from July, 1981. Reopened cases comprised 73.0% of all approvals and represent the continuing return of stepparent cases to active status. Normally, slightly less than half of the total approvals are reopened cases.

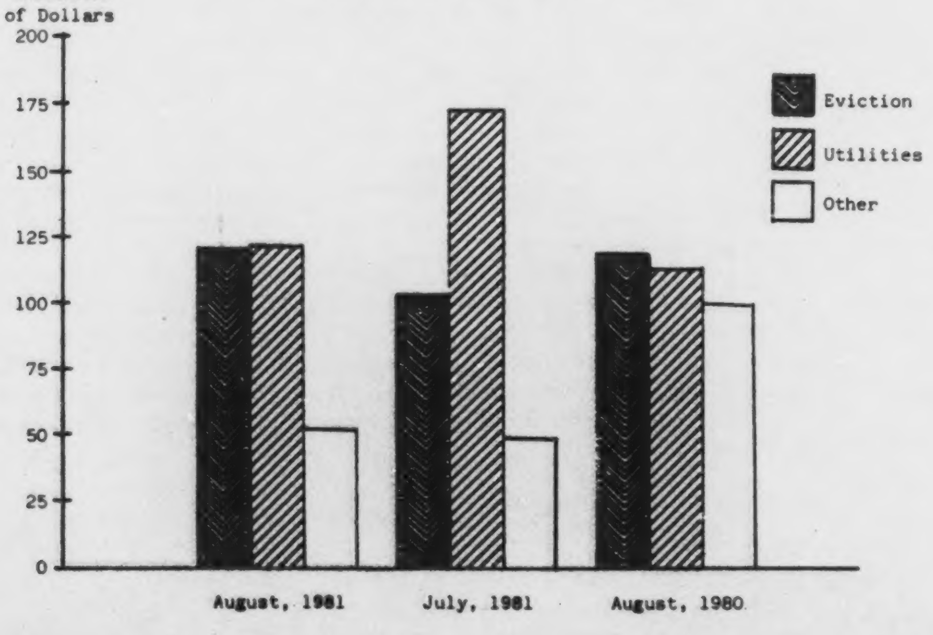
Closings reached 6,962, an increase of 584 (9.2%) above July. The number of closings were only 71 fewer than the approvals. Closings are again reflecting the impact of the stepfather cases with 2,175 reported closed due to stepparent accepting full responsibility for stepchildren. Also, more cases (approximately 300 above average) were closed as a result of children no longer deprived of parental support or care.

Emergency Assistance (EA) - Expenditures totalled $327,759, decreasing $32,381 (-9.0%) below July and $65,501 (-16.7%) lower than in August, 1980. Utilities and evictions together were contributors to 73.7% of the total cost. The emergency labeled "other" which normally includes such items as food, moving, purchase of furniture and appliances, major home repairs, costs related to marital discord, repair of appliances, and stolen cash or checks accounted for another 16.1%. The remaining 10.2% in payments were distributed between the causal factors of fires, death, floods and storms, civil disorders, strikes, illness, accident, emergency fuel, migrancy and unemployment. Approximately two-thirds of the total costs were incurred by AFDC families. The magnitude of the expenditures for AFDC families lies with the urban counties, which paid out $173,209 or 80.1% of the state's total emergency assistance costs for these families. In contrast, the rural and the suburban counties spend a larger proportion of their payments for families other than AFDC.

Cases receiving assistance descended 184 (13.4%) below July, 1980, and were 426 (26.4%) fewer than in August, 1980. Two factors were primarily responsible for the sharp reduction in the annual trend (8-81 vs. 8-80). They are the emergencies of unemployment and other. Compared to one year ago, the number of cases receiving assistance declined 65.2% in the unemployed category while falling 50.4% for those reported in the "other" emergency category. However, cases receiving aid as a result of utilities and eviction comprised 66.0% of the total cases in August, 1981 in comparison with 52.2% for August, 1980. No significant change occurred in the remaining types of emergencies.

Utilities and eviction are the two most prominent emergencies for the two types of EA families. Both emergencies comprise 69.0% and 76.1% of the total costs for each of the "non-AFDC" and "AFDC" families, respectively. Non-AFDC families expend only 6.8% of their total outlay for emergencies listed as "other", whereas AFDC families utilize 20.9% of their entire monies for this purpose. The following bar graph displays expenditures for the three most utilized emergencies of eviction, utilities and other for August, 1981, July, 1981 and August, 1980.

Expenditure Comparisons
by Dominant Causes of Emergencies
August, 1981, July, 1981 and August, 1980



Minnesota Supplemental Aid (MSA) - Fewer recipients and higher expenditures marked the MSA Program during August. Recipients numbered 10,205, a decline of 87 (0.8%) from July and 189 (1.8%) fewer than one year ago. Expenditures advanced $25,374 (2.7%) to $978,073, a level 87,714 (9.9%) greater than August, 1980. This expenditure, the second highest on record, suggests that million dollar MSA monthly totals will soon be a reality.

The average recipient payment totalled $95.84 and resulted from increased expenditures in the blind and disabled categories. The major contributors to this advance were Hennepin and St. Louis Counties, who experienced greater initial and corrective payments within these categories. Hennepin County alone posted a $14,445 advance in initial payments and $11,206 more in corrective payments. St. Louis County also had $3,666 more in adjustments and was accompanied by the counties of Anoka, Dakota and Washington, along with rural counties of Beltrami, Itasca, Nicollet, Polk, Steele, Wabasha, and Winona. This advance, to a large degree, was offset by Ramsey County. The large change in corrective payments is attributable to rate adjustments for board and care residents.

General Assistance (GA) - Participation in the GA Program continued its expected decline. Application activity decreased compared to July. The number of applications received was 33.1% lower and the total applications on hand decreased by 31.9%. The number of applications disposed of decreased by 33.3% to 2,622. Of these 1,882 (71.8%) were approved. The 1,882 cases added in August brought the total cases eligible to 10,536. This was a decrease of 15.3% compared to July. Payments were made for 8,431 (80.0%) of the eligible cases. There were 4,256 cases closed which left 6,280 eligible cases continued to September. Since this is 27.4% lower than the number of eligible cases continued to August, it denotes a further decline in September.

The decline in GA program participation may be seen in the following tables. There has been a substantial decline in recipients in the suburban counties, notably Benton, Sherburne, and Stearns (i.e., St. Cloud vicinity). Note also that recipient declines are more than payment declines which resulted from cutting the lower payment cases from the GA Program as well as from the 6.9% increase in the state standard effective in July.

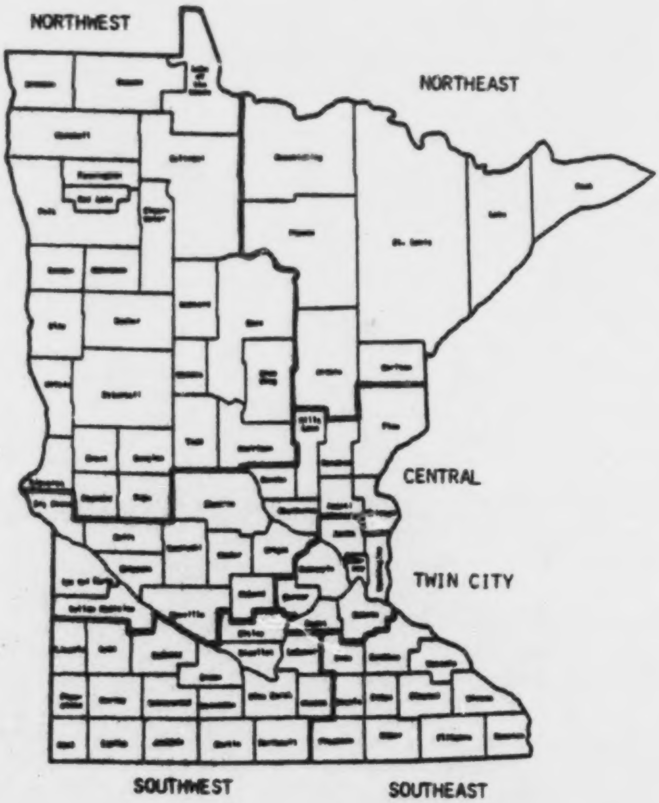
August 1981	64,002.09	68,786.68	1,207,175.23	85,654.81	277,655.84	119,066.14	1,822,340.79



Medical Assistance (MA) - This program posted increases in recipients (2.0%) and payments (9.9%) during August. This change is somewhat deceptive for it represents care for residents of state institutions. These payments were conspicuously absent during July. The inclusion of this population in August's MA roles added 2,469 persons to the total and represented $5,369,706 in expenditures.

Recipients numbered 126,672 in August. This was 2,529 (2.0%) more than July but 1,869 (1.5%) under one year ago. Outpatient hospital care was a factor behind this increase advancing 5,169 recipients (34.0%). Payments totalled $54,279,930 and represented an increase of $4,902,849 (9.9%) from the previous month. By comparison, they were $3,182,926 (6.2%) higher than August, 1980. Although most of the payment advance was attributed to greater state institutional payments, other changes were also evident, particularly payments for Outpatient Hospital up $320,531 (35.0%), Home Health Service up $147,599 (94.7%), and Physician/Osteopathic Service up $343,755 (14.0%). However, Inpatient Hospital costs were $849,240 (14.0%) lower, thereby moderating the overall cost advance.

The number of recipients eligible for MA totalled 229,035 in August and represents a continuance of the trend brought about by larger numbers of AFDC recipients.

During fiscal year 1980, monthly eligibles averaged 224,457 recipients. By comparison, August's totals were 2% higher. The AFDC category during August reflected most of the increase, although this was partially offset by an 11.7% decline in the Needy Children category. The following table compares the number of eligible recipients for August and compares them against the previous fiscal year in each eligibility category.

Comparison of MA Eligible Recipients

Category	August, 1980	F.Y. 1980 Avg.*	Change #	Change %
Aged SSI	11,352	11,396	- 44	(-0.4%)
Blind SSI	391	394	- 3	(-0.8%)
Disabled SSI	15,659	15,628	31	(0.2%)

TOTAL	126,672	$54,279,930	$103,657,011

(1) This table represents state Medicaid system payments plus payments made by counties to primarily medical vendors not covered by the central payments system. Also, in this table, each person is counted under all service categories for which payment is made in his/her behalf during the month.

(2) Recipient recoveries represent collections such as estate settlements, tort recoveries, etc. ... generally third party collections which cannot be tied directly to a specific service billing. The dollar values under this category are always negative.

(3) An additional $11,521 was paid out for EPSDT services during the month; however, these charges were billed in a different fashion and are included under other service types such as Public Health Clinic, Physician/Osteopathic Services, etc. Existing reports do not break these charges out separately.

*May not add due to rounding.

**Includes Lincoln, Lyon and Murray Counties.

***Includes Faribault, Martin and Watonwan Counties.

TECHNICAL NOTES

Table I	Application activity for the AFDC Program does not include applications for medical only needs.
Table II	Under MA, total Persons Concurrently Receiving AFDC are not included when calculating the total number of persons receiving assistance. This is done to unduplicate the total count since these people are already counted under the AFDC Program.
Table III	This table does not include cases and payments made under the Emergency Assistance Program.
Table IV	The sixteen (16) counties identified by the Census Bureau as metropolitan (i.e.; SMSA) are separated into urban and suburban. The urban counties are Hennepin, Ramsey, and St. Louis, and the suburban counties are the thirteen (13) other SMSA counties. These counties are noted (U) and (S) respectively. Two multi-county agencies are labelled as follows: F-M-W HSB includes Faribault, Martin, and Watonwan Counties; Region VIII North includes Lincoln, Lyon, and Murray Counties.
Tables V & VI	Medical Assistance - The program is broken into two components: (1) Those recipients who had a vendor payment made in their behalf and are not concurrently receiving a money payment (the MA-Only group). (2) Those recipients who are concurrently receiving a money payment (AFDC, SSI, MSA) and a medical vendor payment was also made in their behalf. The counts are of people in whose behalf a payment was made out of the State's Centralized Medical Payments System during the month specified.

GLOSSARY

AFDC-UB	AFDC UB . . . An unborn child is included under the definition of child in the AFDC Program and grants are determined accordingly. For this reason, we have counted them as recipients. It is possible for a case which is currently receiving money under another subprogram (such as Unemployed Father or Regular AFDC) to receive an additional amount due to the presence of an unborn child. In instances such as this, the unborn will appear in the child count, but there will be no case or caretaker count since they are carried under the other subprogram.
EPSDT	Early Periodic Screening and Diagnostic Treatment
GAMC	General Assistance Medical Care
HMO	Health Maintenance Organization
Nursing Home ICF-I	Intermediate Care Facility (High Care)
ICF-II	Intermediate Care Facility (Minimum Care)
ICF-MR	Intermediate Care Facility (Mentally Retarded)
OAA-CCR	Old Age Assistance Concurrently Receiving Supplemental Security Income
OAA-MAO	Old Age Assistance, Medical Assistance Only
P.T., O.T., S.T. Audiology in Nursing Home	Physical Therapy, Occupational Therapy, Speech Therapy
Podiatrist Service	Specializing in Foot Care Services
State Institution MR (ICF)	Mentally Retarded, Intermediate Care Facility
SMSA	Standard Metropolitan Statistical Area is a county or a group of contiguous counties which contain at least one city of 50,000 population. In addition to the county of counties containing such cities, contiguous counties are included in such areas if they are essentially metropolitan in character and are socially and economically integrated.
TB	Tuberculosis

ST. PAUL, MINNESOTA

BEST AVAILABLE COPY

This report was prepared by the
Office of Reports and Statistics
Operations Review Division
State of Minnesota
Department of Public Welfare
Additional copies can be
obtained by calling 612-296-6849.

The previous table indicates increases in cases and payments in the current quarter for nearly all county categories, with the exception of urban average cases which decreased by 152 (0.6%). However, in spite of the minor case decline, urban expenditures increased $908,695 (3.4%). Statewide, paid cases increased 1.9% along with a 5.5% rise in expenditures. The suburban counties experienced the highest rate of growth, increasing 5.7% in cases and 8.4% in expenditures compared with a gain of 3.6% in cases and 7.3% in payments in the rural counties. The unemployed parent segment, though relatively small, was a major factor in program growth, registering an increase of 1,618 (54.3%) in cases and $2,461,350 (62.1%) in expenditures. In contrast, the change for the regular segment was 0.7% for average monthly cases and 3.8% for expenditures.

Approvals for September, 1981 totalled 3,732, of which 1,925 (51.6%) were reopened cases. Monthly cases approved are returning to normal following the sharp deviations evident in July and August which resulted from the new stepparent law and federal injunction. Closings, on the other hand, still influenced by the change in stepparent eligibility, surpassed approvals by a large margin. Cases closed in September totalled 6,151. For every case closed, there were 0.61 cases opened.

Emergency Assistance (EA) - Expenditures remained relatively stable during the first quarter of fiscal year 1982. September's payments totalled $317,416, a decline of $10,343 (3.2%) from August and $142,670 (31.0%) less than one year ago.

The major changes from September, 1980 were reductions in the categories of utilities off $45,842 (28.8%), other down $56,727 (51.3%), unemployment off $22,735 (67.1%), and eviction $12,050 (9.5%) lower. Ramsey County was primarily responsible for the high costs recorded within the "other" category because of large outlays for furniture, appliances and major home repairs. However, in recent months, this pattern has tapered off to the extent that it totalled $13,118 in September compared to $67,302 (60.9% of the "other" category) one year ago.

Cases receiving payment declined 24 (2.0%) over the previous month and 600 (34.0%) below September, 1981. Utilities and eviction were responsible for 56.5% of the non-AFDC cases and 89.9% of the AFDC families requiring assistance.

The following table displays the average monthly cases and total expenditures by county type for the first quarter of fiscal years 1980 and 1981:

	July - September, 1981		July - September, 1980	
	Cases	Expenditures	Cases	Expenditures
Statewide	1,240	$1,005,316	1,694	$1,293,756
SMSA	1,041	867,118	1,401	1,079,665
Urban	881	735,011	1,179	906,931
Suburban	160	132,107	222	172,734
Rural	199	$ 138,198	293	$ 214,091

The EA Program's average case rate of utilization in the current quarter declined 454 (26.8%) compared to the corresponding quarter in fiscal year 1980. Total expenditures decreased $289,680 (22.4%). The average grant per case rose from $254.58 to $270.17, an increase of $15.59 (6.1%).

Minnesota Supplemental Aid (MSA) - A slight increase occurred in the number of aged, blind or disabled receiving assistance in September. Payments were made on behalf of 10,239 recipients, 34 (0.3%) more than August but 200 (1.9%) fewer than one year ago. The September advance resulted from a slight increase experienced in all categories, Aged (+12), Blind (+6), and Disabled (+16).

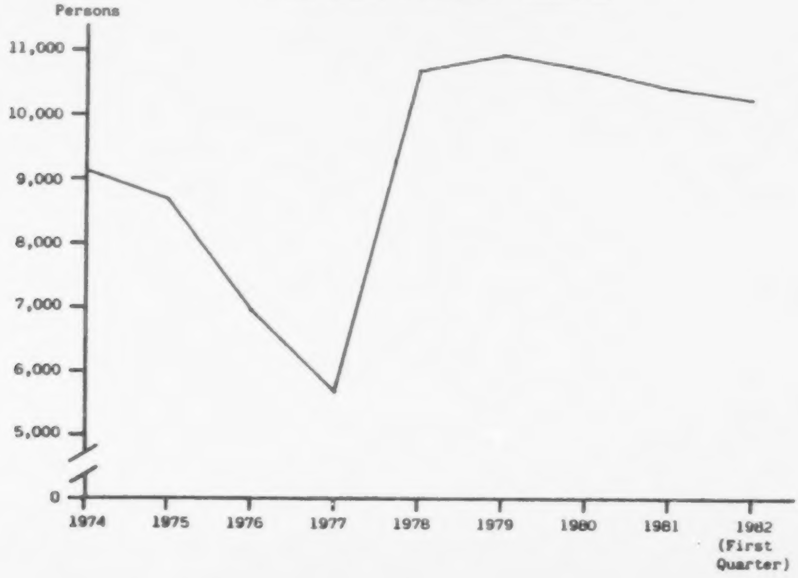
While a number of counties recorded increases, only a few appear to be the foci of the advance. These include the counties of St. Louis, Olmsted and Rice. Their increase can be attributed to a greater number of new cases (initials) and fewer refunds and cancellations. These increases, for the most part, occurred within the Disabled category.

Expenditures totalled $982,129 during the month. This was $4,056 (0.4%) higher than August and, in retrospect, was $138,254 (16.4%) greater than September, 1980.

September's grant averaged $95.92, the second highest total recorded in the last 12 months.

The graph which follows shows the average monthly case load since the inception of the MSA Program in 1974. While numbers and costs have increased, the impetus has been policy changes extending eligibility rather than normal program growth. If MSA had not been subjected to these changes, a slow but steady decline would have been evident.

One example of this is the change occurring between fiscal years 1977 and 1978. This resulted from a legislative action which increased the personal needs allowance for persons in long-term care facilities from $25.00 to $30.00 effective July 1, 1977. Since the federal program (SSI) paid only $25.00 for personal needs to recipients in skilled nursing homes, intermediate care facilities, and state hospitals, the MSA Program was required to make the $5.00 additional payment. As a consequence, the MSA Program grew by 4,627 persons between June and August, 1977.



Minnesota Supplemental Aid
Monthly Recipient Average
Fiscal Years 1974-1982 (First Quarter)

General Assistance (GA) - The average grant continues to rise. This trend is the result of the decreasing number of cases, caused by the program eligibility changes initiated in July. These changes have left remaining on GA those cases which typically receive higher payments.

This month's statistics indicate that the continued drop in cases since March is levelling off. There were 5.6% more applications received in September than in August, and there were 3.6% more applications on hand. Out of the 2,716 applications disposed of, 2,008 were approved. The number approved is 6.7% more than the August figure, and the 2,415 cases closed is 45.2% less than August. Thus, with more approvals and fewer closings it seems clear that the downward trend in GA cases due to the changed eligibility requirements has discontinued.

The 2,008 cases added in September brought the total eligible cases to 8,288* which is 20% less than the August figure. Likewise, the total paid cases (7,191) is 26% less than August. There were 5,841 eligible cases continued to October.

Medical Assistance (MA) - Expenditures were $60,633,819 for 142,269 recipients during September 1981. Payments rose $6,353,889 (11.7%) from last August and $10,160,787 (20.1%) from one year ago. The accompanying increases in the number of recipients were 15,597 (12.3%) from the previous month and 16,557 (13.2%) compared to last year.

With costs and utilization both rising, the average cost per recipient was $426.19. This reflected an increase from last year's average of $401.50 and a slight decline from August's $428.51 average.

As noted above, the increase in the number of recipients utilizing MA services was comparable for both last month and one year ago. The largest share of the increase was reported in the AFDC category. The following table provides a summary for comparative purposes:

MA Utilization by Basis of Eligibility and Month

Basis of Eligibility	September, 1981	August, 1981	September, 1980
Aged SSI	8,382	8,363	8,230
Blind SSI	295	289	285
Disabled SSI	12,920	12,421	12,233
AFDC	78,966	65,663	66,118
Medical Only Aged	26,520	25,432	23,781
Medical Only Blind	115	126	121
Medical Only Disabled	8,180	7,984	7,357
AFDC Related	1,522	1,357	1,326
Needy Children	5,369	5,037	6,261
Total	142,269	126,672	125,712

---

*This figure may be somewhat underreported by St. Louis and Ramsey Counties.

TOTAL	142,269	$60,633,819	$164,290,830

(1) This table represents state Medicaid system payments plus payments made by counties to primarily medical vendors not covered by the central payments system. Also, in this table, each person is counted under all service categories for which payment is made in his/her behalf during the month.

(2) Recipient recoveries represent collections such as estate settlements, tort recoveries, etc. ... generally third party collections which cannot be tied directly to a specific service billing. The dollar values under this category are always negative.

(3) An additional $7,657 was paid out for EPSDT services during the month; however, these charges were billed in a different fashion and are included under other service types such as Public Health Clinic, Physician/Osteopathic Services, etc. Existing reports do not break these charges out separately.

TECHNICAL NOTES

Table I	Application activity for the AFDC Program does not include applications for medical only needs.
Table II	Under MA, total Persons Concurrently Receiving AFDC are not included when calculating the total number of persons receiving assistance. This is done to unduplicate the total count since these people are already counted under the AFDC Program.
Table III	This table does not include cases and payments made under the Emergency Assistance Program.
Table IV	The sixteen (16) counties identified by the Census Bureau as metropolitan (i.e.; SMSA) are separated into urban and suburban. The urban counties are Hennepin, Ramsey, and St. Louis, and the suburban counties are the thirteen (13) other SMSA counties. These counties are noted (U) and (S) respectively. Two multi-county agencies are labelled as follows: F-M-W HSB includes Faribault, Martin, and Watonwan Counties; Region VIII North includes Lincoln, Lyon, and Murray Counties.
Tables V & VI	Medical Assistance - The program is broken into two components: (1) Those recipients who had a vendor payment made in their behalf and are not concurrently receiving a money payment (the MA-Only group). (2) Those recipients who are concurrently receiving a money payment (AFDC, SSI, MSA) and a medical vendor payment was also made in their behalf. The counts are of people in whose behalf a payment was made out of the State's Centralized Medical Payments System during the month specified.

GLOSSARY

AFDC-UB	AFDC UB . . . An unborn child is included under the definition of child in the AFDC Program and grants are determined accordingly. For this reason, we have counted them as recipients. It is possible for a case which is currently receiving money under another subprogram (such as Unemployed Father or Regular AFDC) to receive an additional amount due to the presence of an unborn child. In instances such as this, the unborn will appear in the child count, but there will be no case or caretaker count since they are carried under the other subprogram.
EPSDT	Early Periodic Screening and Diagnostic Treatment
GAMC	General Assistance Medical Care
HMO	Health Maintenance Organization
Nursing Home ICF-I	Intermediate Care Facility (High Care)
ICF-II	Intermediate Care Facility (Minimum Care)
ICF-MR	Intermediate Care Facility (Mentally Retarded)
OAA-CCR	Old Age Assistance Concurrently Receiving Supplemental Security Income
OAA-MAO	Old Age Assistance, Medical Assistance Only
P.T., O.T., S.T. Audiology in Nursing Home	Physical Therapy, Occupational Therapy, Speech Therapy
Podiatrist Service	Specializing in Foot Care Services
State Institution MR (ICF)	Mentally Retarded, Intermediate Care Facility
SMSA	Standard Metropolitan Statistical Area is a county or a group of contiguous counties which contain at least one city of 50,000 population. In addition to the county of counties containing such cities, contiguous counties are included in such areas if they are essentially metropolitan in character and are socially and economically integrated.

TECHNICAL NOTES 27

GLOSSARY 28

October, 1981 - In Summary

All Programs - Persons receiving Income Maintenance dropped 10,001 (-4.6%) in October to 207,552, resulting primarily from the implementation of new federal regulations on AFDC families with earned income. Of the 10,001 decline, 8,459 were persons in AFDC families, 1,188 were Medical Only recipients (primarily senior citizens), and 327 were recipients of General Assistance. The annual trend shows a decline of 17,939 (-8.0%) accounted for by 8,525 AFDC recipients, 9,179 General Assistance persons, and 640 Emergency Assistance recipients. The annual trend also reflects eligibility restrictions.

Assistance costs were higher, however, despite the lower recipient count. The $86,957,333 in payments was $5,934,474 (+7.3%) above September, 1981 and $14,054,257 (+19.3%) over October, 1980. Medical payments account for both the monthly and annual trends. In particular, retroactive payments for patients in state hospitals account for the monthly trend, and part of the annual increase. Inpatient hospital costs and nursing home costs were also factors in the annual trend.

Aid to Families with Dependent Children (AFDC) - October, 1981 represents the second consecutive month in which total payments declined. Payments for the current month were $16,451,948, a decrease of $1,020,106 (5.8%) below September, 1981 and $1,826,853 (10.0%) lower than in August, 1981. The abrupt deviation in the monthly payments trend is related to the AFDC program changes resulting from the U.S. omnibus reconciliation amendments. Several of the amendments contained within this bill were implemented on October 1, 1981. The major changes influencing payments and eligibility effective in the present month are retrospective budgeting (eligibility and payment for the payment month based on income received in the second prior calendar month), reduction in earnings disregards, inclusion of advance earned income tax credit payment as earned income, $10 minimum payment level (cases whose grant is computed to be below $10 did not receive a money payment), and lump sum payments which are defined as nonrecurring earned income and unearned income which when added to recurring income exceeds the standard of need. Gifts, inheritances, contributions, some insurance settlements, back pay and profit-sharing income are examples of lump sums. In comparison with October, 1980, payments diminished by $945,040 (5.4%).

The implementation of the federal regulations also eliminated many previously eligible cases. For example, in September, 1981, 2,244 cases were closed due to 1981 federal changes relating to earned income. In October, an additional 581 cases were closed for this identical reason, thereby bringing the two-month total to 2,825 cases. In the current month, cases receiving payment were reduced to 47,757, down 3,160 (6.2%) from September, 1981, 6,692 (12.3%) fewer than in August, 1981 and 5,703 (10.7%) below October, 1980. Another major factor in widening the sharp spread of paid cases between August and October, 1981 was a state law requiring stepparents to accept full responsibility for their stepchildren. In August, 2,175 cases were closed (as a result of this cause). Case declines by segment in October in comparison with September are Regular -2,868 (-6.4%), Unemployed Parent -213 (-4.5%), Unborn Only -79 (-6.5%), and Unborn Concurrent -51 (-6.4%).

Support collections were $1,547,401, the lowest since February, 1981. All county types reported reduced collections. October's IV-D collections represented 8.6% of the total maintenance needs.

The number of 18 year old children receiving assistance dropped to 803 or 4.6% below that for September. Payments dropped 6.3%. The average payment per 18 year old was $120.80.

Payments for special needs accrued to $20,152. These payments were issued to 200 families with 625 persons. The average payment per family was $100.76. Replacement of furniture and appliances accounted for 83.6% of the total expenditures.

Emergency Assistance (EA) - During October, this assistance program registered declines in cases, recipients and payments. This is the fifth consecutive month of falling payment levels and is attributable to lower numbers of AFDC and non-AFDC families. Each declined 14 cases from the previous month, to 805 and 330 respectively.

Recipients totalled 3,890 in October, 28 (0.7%) below September's level and 2,262 (36.8%) less than one year ago. AFDC persons represented 67.6% of all recipients during October, which is comparable to one year ago when they represented 69.1%.

Monthly expenditures totalled $315,655. This was 1,761 (0.6%) below the previous month and $186,385 (37.1%) less than one year ago. Increases were recorded by the emergency categories of Strike, Illness, Accident, Eviction, Utilities and Emergency Fuel. Together these emergencies were $9,894 higher than the previous month. However, declines occurring within the categories of Fire, Death, Migrant Family, Other and particularly No Employment and No Furniture/Appliances exceeded the gains registered and resulted in a lower expenditure for the month.

The predominant emergency in October was Utilities, which increased $4,421 (3.9%) from September to $117,639. This category represented 37.3% of expenditures during the month. Eviction from Shelter, in second place at $114,758, advanced by only $1,020 (0.9%). Hennepin County was the major contributor to these categories, accounting for $61,147.69 (52.0%) of the utility cost and $82,861.16 (71.6%) of the eviction-related expenses. Most of Hennepin County's expenditures fell within the AFDC category during October, specifically $48,481 (79.5%) of the Utility emergency and $63,412 (76.5%) of the evictions were for AFDC families.

Minnesota Supplemental Aid (MSA) - In October, 10,287 persons received assistance through this program. This is 48 (0.5%) higher than September but 191 (1.8%) lower than one year ago. Expenditures failed to follow suit, declining $3,423 (0.3%) from September's level to $978,706. October's payment, however, is $142,368 (17.0%) higher than October, 1980.

The average grant totalled $95.14 during October, the third consecutive month that the $95.00 level has been exceeded. The major contributor to this month's payment average is the Blind category, which averaged $89.90. This is $6.05 (7.2%) above September's average. The advance was induced by a $1,024.38 special needs payment for one case in St. Louis County.

The advance in October's case load occurred in Hennepin +15, LeSueur +4, St. Louis +9, Waseca +24, and Wright +4. Waseca County's increase is the result of their practice of making $10 monthly payments for clothing to boarding home residents and state hospital patients at quarterly intervals.

Lower monthly expenditures are attributable to lower payments in the three urban counties. These were offset partially by higher payments in Aitkin (+$8,000) and Olmsted (+$6,000) Counties, but these payments were not large enough to counter the trend.

General Assistance (GA) - The October 1981 case load shows a yearly low of 7,676 persons aided, continuing the downward trend since March, 1981 when 19,444 persons were provided financial assistance. Eligibility restrictions (implemented in July, 1981) account for the trend. The number of unemployed increased in September and October, but the "needy unemployed" are no longer eligible for GA.

The October decline of 327 (-4.1%) persons was general throughout the state as most counties reported fewer persons aided. Compared to a year ago, the October, 1981 case load was down 9,179 (-54.5%).

Despite the lower case load, GA expenditures were up in October by $29,992 (+1.9%). The increase in expenditures occurred primarily in Hennepin and Ramsey Counties, and represented higher board and room payments (rate adjustments) and higher payments for women in battered women shelters.

The October GA expenditures of $1,647,433 were $897,755 (-35.3%) below October, 1980. The relative decline in costs is lower than that of case load because the cases that continue to receive assistance are the higher cost cases.

Medical Assistance (MA) - The total expenditure for MA during October 1981 was $67,563,591 for 137,324 recipients. Payments were $6,929,772 higher than September, an increase of 11.4%, and they were $15,941,069 above the year-ago total, for a rise of 30.9%. The recipient count declined 4,945 (3.5%) from last month, while increasing 2,805 (2.1%) from October 1980.

The resulting average expenditure per person rose to $492.00 for the month. This reflects an increase of 15.4% from September, when the average was $426.19, and a 28.2% rise from the $383.76 average from one year ago.

To a large degree, the substantial increase for October 1981 was a result of the institutional payments made during the months being compared. Payments of $13,643,617 for 2,795 recipients were made in October 1981, while $6,910,930 was paid for 2,612 recipients in September, and $6,382,462 was expended for 2,777 recipients during October 1980. Removing institutional payments produces the following expenditure/utilization table:

Medical Assistance (Excludes Institutional Payments)

Month	Recipients	Expenditures	Average Expenditure Per Person
October 1980	131,742	$45,240,061	$343.40
September 1981	139,657	53,722,889	384.68
October 1981	134,529	$53,919,973	$400.81

By considering expenditures with this exclusion, October's total is just 0.4% higher than September and 19.2% above October 1980. The average expenditure per person rose 4.2% from September and 16.7% from October of last year.

The minute change in expenditures compared to September masks differences in utilization by category of service. A $1.5 million decline in costs of Nursing Home care resulted mostly from the fact that October payments settle the September bills (30 days), while September payments cover August (31 days). During the same payment period, Inpatient Hospital costs rose $2.5 million, as both the number of recipients and the utilization per recipient increased from the prior month.

(1)This table represents state Medicaid system payments plus payments made by counties to primarily medical vendors not covered by the central payments system. Also, in this table, each person is counted under all service categories for which payment is made in his/her behalf during the month.

(2)Recipient recoveries represent collections such as estate settlements, tort recoveries, etc. ... generally third party collections which cannot be tied directly to a specific service billing. The dollar values under this category are always negative.

(3)An additional $0 was paid out for EPSDT services during the month; however, these charges were billed in a different fashion and are included under other service types such as Public Health Clinic, Physician/Osteopathic Services, etc. Existing reports do not break these charges out separately.

*May not add due to rounding.
**Includes Lincoln, Lyon and Murray Counties.
***Includes Faribault, Martin and Watonwan Counties.

TECHNICAL NOTES

Table I	Application activity for the AFDC Program does not include applications for medical only needs.
Table II	Under MA, total Persons Concurrently Receiving AFDC are not included when calculating the total number of persons receiving assistance. This is done to unduplicate the total count since these people are already counted under the AFDC Program.
Table III	This table does not include cases and payments made under the Emergency Assistance Program.
Table IV	The sixteen (16) counties identified by the Census Bureau as metropolitan (i.e.; SMSA) are separated into urban and suburban. The urban counties are Hennepin, Ramsey, and St. Louis, and the suburban counties are the thirteen (13) other SMSA counties. These counties are noted (U) and (S) respectively. Two multi-county agencies are labelled as follows: F-M-W HSB includes Faribault, Martin, and Watonwan Counties; Region VIII North includes Lincoln, Lyon, and Murray Counties.
Tables V & VI	Medical Assistance - The program is broken into two components: (1) Those recipients who had a vendor payment made in their behalf and are not concurrently receiving a money payment (the MA-Only group). (2) Those recipients who are concurrently receiving a money payment (AFDC, SSI, MSA) and a medical vendor payment was also made in their behalf. The counts are of people in whose behalf a payment was made out of the State's Centralized Medical Payments System during the month specified.

GLOSSARY

AFDC-UB	AFDC UB . . . An unborn child is included under the definition of child in the AFDC Program and grants are determined accordingly. For this reason, we have counted them as recipients. It is possible for a case which is currently receiving money under another subprogram (such as Unemployed Father or Regular AFDC) to receive an additional amount due to the presence of an unborn child. In instances such as this, the unborn will appear in the child count, but there will be no case or caretaker count since they are carried under the other subprogram.
EPSDT	Early Periodic Screening and Diagnostic Treatment
GAMC	General Assistance Medical Care
HMO	Health Maintenance Organization
Nursing Home ICF-I	Intermediate Care Facility (High Care)
ICF-II	Intermediate Care Facility (Minimum Care)
ICF-MR	Intermediate Care Facility (Mentally Retarded)
OAA-CCR	Old Age Assistance Concurrently Receiving Supplemental Security Income
OAA-MAO	Old Age Assistance, Medical Assistance Only
P.T., O.T., S.T. Audiology in Nursing Home	Physical Therapy, Occupational Therapy, Speech Therapy
Podiatrist Service	Specializing in Foot Care Services
State Institution MR (ICF)	Mentally Retarded, Intermediate Care Facility
SMSA	Standard Metropolitan Statistical Area is a county or a group of contiguous counties which contain at least one city of 50,000 population. In addition to the county of counties containing such cities, contiguous counties are included in such areas if they are essentially metropolitan in character and are socially and economically integrated.

VII. Supplemental Security Income and Supplemental Aid by County - November, 1981 24-25

TECHNICAL NOTES 26

GLOSSARY 27

November, 1981 - In Summary

All Programs - November trends in persons aided was dominated by the court decision to reinstate AFDC families whose cases were terminated in October because of federal regulations. Total persons aided in November of 214,066 was 6,514 (+3.1%) above October. Also contributing to this trend was an increase in Medical Only recipients which resulted from more medical claims processed during the month.

Compared to November, 1980, persons aided was down 7,766 (-3.5%), reflecting restricted eligibility for AFDC and GA.

The monthly trend in expenditures corresponds to the higher case load. Total costs in November were $90,375,901, $3,418,568 (+3.9%) above October and $25,233,192 (+38.7%) over November, 1980. The substantial increase over the previous year resulted primarily from a lapse in payments for residents in state facilities for the mentally retarded and mentally ill in November, 1980.

Aid to Families with Dependent Children (AFDC) - November, 1981 net maintenance payments rose to an all-time high of $18,680,898, an increase of $2,228,950 (13.5%) above October, 1981. This abrupt rise in costs stems from a preliminary injunction issued by the Federal District Court on October 22, 1981 which halts and reverses the implementation of several provisions of the Omnibus Reconciliation Act of 1981, dealing with earned income disregards, work expense deductions, child care deductions and adjustments for overpayments. (These provisions were adhered to in determining the October grants.) The Court ordered an immediate reinstatement of all October benefits which were reduced or terminated because of these provisions, and to go back to the methods of calculating net earned income and recoupment which were in effect prior to October 1, 1981. The current month's expenditures were $1,317,515 (7.6%) higher than in November, 1980.

An additional 1,887 (4.0%) families in November brought the total receiving payment to 49,644. The bulk of the case increase is attributed to the regular segment with unemployed parent cases increasing only 70 (1.6%). By contrast, payment cases were 4,212 (7.9%) fewer when compared with November, 1980, reflecting the enforcement of eligibility restrictions contained within the changes in state law concerning stepparents.

Approvals totalled 5,590 cases, rising 1,535 (37.9%) above October, 1981. The strong gain in approvals reflects the effect of the injunction as 2,778 cases were reported opened due to change in state law or assistance program policy. Reopened cases comprised 73.0% of the total approvals compared with 50.8% in October, 1981 and 43.8% in November, 1980. For every new case opened, there were 3.45 cases reopened.

Closings were down to 3,440, 918 (21.1%) less than in October and 2,711 (44.1%) below September, 1981. Closings in September represent 2,300 cases eliminated as a result of the implementation of federal regulations on October 1. For every case closed in the current month, 1.63 cases were approved.

Emergency Assistance (EA) - This program recorded declines in the number of families and expenditures during November. This resulted from a 22.2% reduction (from 805 to 626) in the number of AFDC families seeking assistance.

Cases requiring assistance totalled 954 during the month. This was 181 (15.9%) fewer than October and 220 (18.7%) less than one year ago. AFDC families accounted for 98.9% of the October to November decline. Most of this occurred within the emergencies of Utilities and Eviction. Together these categories represented 88.3% of the AFDC case load decline and 86.3% of the expenditure change.

Expenditures totalled $257,129 during the month, $58,526 (18.5%) below October. By contrast, it was $292,319 one year ago, $35,190 (12.0%) more.

Emergency Fuel was one category which showed considerable change, increasing nearly 300% to $9,570. The emergencies of Fire and Accident also increased, but were not sufficient to influence state totals.

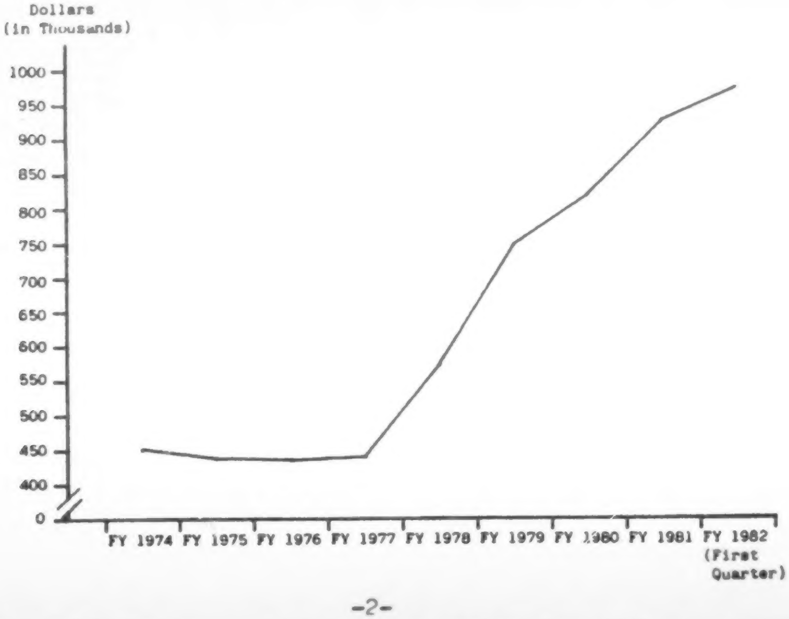
Minnesota Supplemental Aid (MSA) - Fewer recipients and lower payments marked the MSA Program during November. This is a predictable occurrence since the previous month, October, was influenced by quarterly payments to Aged recipients residing in boarding homes and state hospitals.

November's recipients numbered 10,227. This was 60 (0.6%) fewer than October and 166 (1.6%) less than one year ago. Most of the change (56 cases) was within the Aged category. The major declines (five cases or over) occurred in Hennepin (-20), Nobles (-5), St. Louis (-6) and Waseca (-15) Counties.

Expenditures totalled $972,922 during the month. This was $5,784 (0.6%) below October but $100,528 (11.5%) more than November, 1980.

The graph below shows the average monthly expenditures since the inception of the MSA Program in 1974.

Minnesota Supplemental Aid
Monthly Expenditure Average
Fiscal Years 1974-1982 (First Quarter)



General Assistance (GA) - Restricted eligibility conditions for GA effective July, 1981 has reduced the number of applicants. The number of requests for assistance in July through November, 1981 is almost half (57%) those received in the same period in 1980. However, application activity is still high relative to the number of cases receiving assistance, indicating a continued high turnover of case load. The 2,292 requests received in November (an annual rate of 27,504) compares with the number of cases receiving assistance of 6,678.

The number of applications acted upon in November totalled 2,361, of which 1,753 (74.2%) were approved and 608 (25.8%) were denied.

The 7,369 persons aided in November was a low point for the year, declining 307 (-4.0%) from October, and 8,600 (-53.9%) from November, 1980. The monthly trend occurred in Hennepin and Ramsey Counties, representing mostly single persons. It is not possible to determine what eligibility groups (illness, incapacity, injury, five-week employables, etc.) is represented in the monthly decline as this information is not reported as yet by Hennepin County. However, the annual trend represents employable persons as this group is no longer eligible for GA.

GA expenditures totalled $1,532,600 in November, down $114,812 from October. Declines were noted in costs of board and room care, battered women shelters, and in living arrangements other than congregate care. Compared to November, 1980, expenditures were down $1,008,254 (-39.7%), again reflecting the eligibility restrictions to nonemployables.

Medical Assistance (MA) - During November, the expenditure of $68,932,332 provided coverage for 150,471 recipients. The current expenditure increased 2.0% from last month and 56.4% from November, 1980. Concurrently, the number of recipients rose 9.6% from October and 23.4% from last year.

Over half of the expenditure increase from one year ago came from institutional payments and hospital care. The difference in the amount of institutional payments was the result of no major payments being made during November, 1980. Only adjustments were recorded. This also affected recipient utilization counts, since the adjustments affected relatively few recipients. The difference in hospital care costs was almost exactly proportional to the change in the number of recipients. The remainder of the year-to-year increase was distributed over several other service categories.

The monthly increase in recipients and expenditures was due to the processing of three warrant cycles during November. This aberration in the number of cycles results from the biweekly processing of payments and produces levels that are substantially higher than those produced during a normal month with two warrant cycles.

TOTAL	150,471	$68,932,372	$300,786,793

(1) This table represents state Medicaid system payments plus payments made by counties to primarily medical vendors not covered by the central payments system. Also, in this table, each person is counted under all service categories for which payment is made in his/her behalf during the month.

(2) Recipient recoveries represent collections such as estate settlements, tort recoveries, etc. ... generally third party collections which cannot be tied directly to a specific service billing. The dollar values under this category are always negative.

(3) An additional $6,833 was paid out for EPSDT services during the month; however, these charges were billed in a different fashion and are included under other service types such as Public Health Clinic, Physician/Osteopathic Services, etc. Existing reports do not break these charges out separately.

*May not add due to rounding.
**Includes Lincoln, Lyon and Murray Counties.
***Includes Faribault, Martin and Watonwan Counties.

TECHNICAL NOTES

Table I	Application activity for the AFDC Program does not include applications for medical only needs.
Table II	Under MA, total Persons Concurrently Receiving AFDC are not included when calculating the total number of persons receiving assistance. This is done to unduplicate the total count since these people are already counted under the AFDC Program.
Table III	This table does not include cases and payments made under the Emergency Assistance Program.
Table IV	The sixteen (16) counties identified by the Census Bureau as metropolitan (i.e.; SMSA) are separated into urban and suburban. The urban counties are Hennepin, Ramsey, and St. Louis, and the suburban counties are the thirteen (13) other SMSA counties. These counties are noted (U) and (S) respectively. Two multi-county agencies are labelled as follows: F-M-W HSB includes Faribault, Martin, and Watonwan Counties; Region VIII North includes Lincoln, Lyon, and Murray Counties.
Tables V & VI	Medical Assistance - The program is broken into two components: (1) Those recipients who had a vendor payment made in their behalf and are not concurrently receiving a money payment (the MA-Only group). (2) Those recipients who are concurrently receiving a money payment (AFDC, SSI, MSA) and a medical vendor payment was also made in their behalf. The counts are of people in whose behalf a payment was made out of the State's Centralized Medical Payments System during the month specified.

GLOSSARY

AFDC-UB	AFDC UB . . . An unborn child is included under the definition of child in the AFDC Program and grants are determined accordingly. For this reason, we have counted them as recipients. It is possible for a case which is currently receiving money under another subprogram (such as Unemployed Father or Regular AFDC) to receive an additional amount due to the presence of an unborn child. In instances such as this, the unborn will appear in the child count, but there will be no case or caretaker count since they are carried under the other subprogram.
EPSDT	Early Periodic Screening and Diagnostic Treatment
GAMC	General Assistance Medical Care
HMO	Health Maintenance Organization
Nursing Home ICF-I	Intermediate Care Facility (High Care)
ICF-II	Intermediate Care Facility (Minimum Care)
ICF-MR	Intermediate Care Facility (Mentally Retarded)
OAA-CCR	Old Age Assistance Concurrently Receiving Supplemental Security Income
OAA-MAO	Old Age Assistance, Medical Assistance Only
P.T., O.T., S.T. Audiology in Nursing Home	Physical Therapy, Occupational Therapy, Speech Therapy
Podiatrist Service	Specializing in Foot Care Services
State Institution MR (ICF)	Mentally Retarded, Intermediate Care Facility
SMSA	Standard Metropolitan Statistical Area is a county or a group of contiguous counties which contain at least one city of 50,000 population. In addition to the county of counties containing such cities, contiguous counties are included in such areas if they are essentially metropolitan in character and are socially and economically integrated.

GLOSSARY 33

December, 1981 - In Summary

All Programs - Unemployment was the primary reason for an increase in persons aided in December. The unemployed in Minnesota are using the AFDC Program for financial assistance during this recession much more than in the past. The increased utilization is noted to be relatively higher in the nonmetropolitan counties.

Persons aided in all programs totalled 214,742 in December, 676 (+0.3%) above November, but 16,080 (-7.0%) below December, 1980. The annual trend continues to reflect primarily eligibility restrictions in AFDC and General Assistance.

Expenditures for financial assistance were lower in December, resulting primarily from fewer medical claims processed and fewer units of service for nursing home patients (December payments were for November which is a 30-day month). December costs were $80,982,892, $9,393,009 (-10.4%) below November, and $4,142,351 (-4.9%) under December, 1980. The annual trend reflects fewer claims processed for medical care, and lower costs in General Assistance.

Aid to Families with Dependent Children (AFDC) - Over the past several months, net payments have fluctuated significantly. Implementation of new federal regulations followed by court injunctions to halt the enforcement of them are primarily responsible for this effect. In December, 1981, net payments fell to $17,088,306 or a decline of $1,592,592 (8.5%) below November, 1981. This payment reduction was anticipated as November's payments included large numbers of supplemental payments for October to cases which were affected by federal actions implemented during that month.

In December, 50,111 cases received payment, a rise of 467 (0.9%) above November and 3,745 (7.0%) below December, 1980. The annual trend in cases reflects the impact of the regulations concerning children in stepparent situations.

The major case increases occurring in December were within the Unemployed Parent segment, with 376 (8.2%) additional cases receiving payment. Unemployed Parent payment cases are up 1,542 (45.4%) above December, 1980. The Regular segment remained relatively stable in December, displaying only a slight monthly increase of 50 cases (0.1%). By comparison, Regular cases are down 4,066 (8.4%) below December, 1980.

Minor case increases also occurred in the Unborn segments with the "Unborn Only" rising 41 cases (3.8%) and the "Unborn Concurrent" advancing by 12 (1.7%).

Cases approved displayed extreme fluctuations during the past several months, again a reflection on federal program changes and court injunctions. In December, 1981, 3,725 cases were approved, a decline of 1,865 (-33.4%) below November, 1981. Reopened cases continue to surpass new cases. This has been true since May, 1981. For every new case opened in December, there were 1.17 cases reopened.

December case closings totalled 3,289, descending -151 (-4.4%) under November, 1981. Each case closed was offset by 1.13 openings.

AFDC expenditures for the first six months of fiscal year 1982 were $106,152,908 or $3,296,337 (3.2%) greater than in the corresponding period in fiscal year 1981. The 3.2% increase bears greater significance when contrasted with the July - December, 1980 change of $17,320,571 (20.2%) above the same six-month period in 1979. The following table exhibits the July - December changes since 1979 for the Regular and Unemployed Parent segments. Note the moderating of the increases in the current six-month period, the Regular program falling because of eligibility restrictions, and the Unemployed Parent component advancing because of deteriorating economic conditions.

AFDC
Regular and Unemployed Parent
Changes in Average Monthly Cases and Expenditures During the July - December Period (1979 to 1981)

Regular Segment

	Cases (Monthly Average)				Payments (Monthly Average)			
	1981	Change from 1980	1980	Change from 1979	1981	Change from 1980	1980	Change from 1979

Urban	1,891	+41.2%	1,339	+ 77.8%	857,249	+ 51.3%	566,503	+ 89.8%
Suburban	990	+45.2%	682	+146.2%	461,473	+ 48.9%	309,986	+154.2%
Rural	1,748	+61.6%	1,082	+253.6%	$ 830,534	+ 72.2%	$ 494,362	+264.5%

For the six-month period July through December, 1981, approvals totalled 32,098, an increase of 9,790 (43.9%) above the corresponding months in 1980. Reopened cases comprised 21,207 (66.1%) of the total compared to 9,680 (43.4%) for the comparable months in 1980. Change in state law or assistance program policy was the qualifying reason given for the 11,101 (34.6%) of the openings.

The final six months tallied 30,578 closings, up 12,038 (64.9%) from the previous year. The major reasons for closings were refusal to provide essential information (5,678), stepparent accepting full responsibility for children (4,995), federal changes on earned income, lump sum, and other (3,977), transfer to another county (3,277), child not deprived of parental support (2,482), and at request of recipient (2,260). These six reasons were responsible for 74.1% of the closings.

In reviewing the current six months, support collections equalled $10,200,309, a rise of $1,972,193 (24.0%) above the same period in 1980. Support collections represented 8.8% of the net AFDC maintenance costs, up 0.5% from the exact months in 1980.

The continued growth of the Unemployed Parent segment has been mentioned earlier. However, attention should be called to the change that has occurred in the distribution of Minnesota's UP recipients. During December, the number of rural UP recipients advanced by 13.9% to 8,256. The rural category is now the program's largest, having surpassed the suburban counties in the second half of fiscal year 1979. Compared with one year ago, the number of recipients is up 46.9% as the table on page 4 shows.

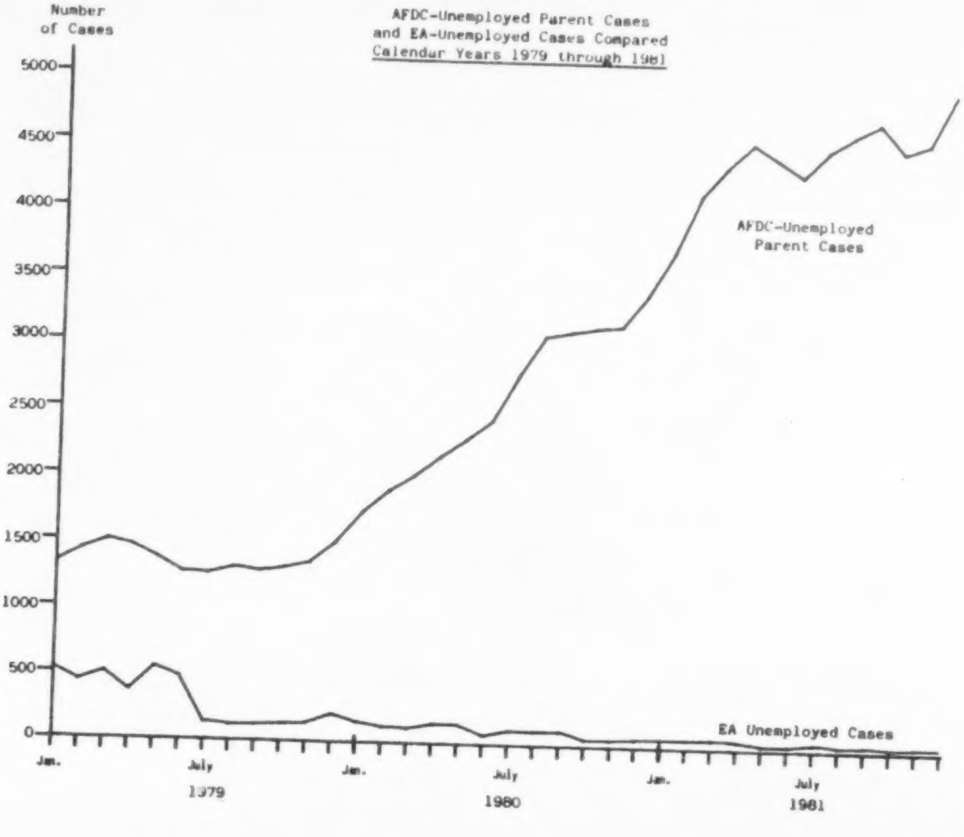
*Includes Lincoln, Lyon and Murray Counties.

**Includes Faribault, Martin and Watonwan Counties.

Emergency Assistance (EA) - For the seventh consecutive month, this program recorded lower expenditures. Cases served, at 936, were 18 (1.9%) fewer than the previous month and 341 (26.7%) below one year ago. Expenditures totalling $253,384 were $3,745 (1.5%) less than November and $61,596 (19.6%) under December, 1980. These reductions occurred in both the AFDC and non-AFDC (Other) categories.

Compared to one year ago, the case load composition has changed little. The AFDC component represented 66.2% in December whereas in December, 1980, it was 67.7%. However, the case load is approximately 25% lower (28.3% AFDC, 23.3% Other) than one year ago. The major areas of decline are in No Employment off 31 cases (47.0%), Other off 357 cases (60.2%) and Emergency Fuel off 42 cases (59.2%). However, one emergency category, Utilities, grew within this one-year period. It advanced 142 cases or 126.8%. Approximately 60% of these Utility expenditures are for AFDC families. This is comparable to one year ago when 59.6% was recorded.

The decline in the number of emergencies because of no employment cases has been briefly mentioned above. This emergency area has been registering declines since the beginning of fiscal year 1979. The graph and table which follow show this vividly. The underlying factor behind this decline appears to be the use of the Unemployed Parent segment of AFDC. This was a practical response to counties who recognized the futility of using EA to meet a long-term crisis. Employment possibilities were being seriously limited in the contracting job market so immediate use of AFDC was obviously more appropriate.



AFDC-Unemployed Parent Cases
and EA-Unemployed Cases Compared
Calendar Years 1979 through 1981

Minnesota Supplemental Aid (MSA) - December was characterized by fewer recipients and higher expenditures. Recipients, numbering 10,214, were 13 (0.1%) below November and 176 (1.7%) fewer than one year ago. Expenditures by contrast advanced $3,574 (0.4%) to $976,496, which was $69,510 (7.7%) more than December, 1980.

The average grant for the month was $95.60, $0.47 (0.5%) above November. The change occurred within the Disabled category, which grew by $3.37 (0.3%) to $107.83. Hennepin County was the focus of the change, advancing $38,270 because of new cases. Had not this growth occurred, the average MSA expenditure per person would have declined in response to lower averages posted by the Aged and Blind categories. The Aged alone dropped $6.53 (8.9%) to $66.89. This was prompted by fewer special needs payments and higher refunds and cancellations during the month. However, this reduction of $21,036 (9.7%) could not offset the $25,084 (3.4%) advance occurring within the Disabled segment.

General Assistance (GA) - The general statistics on GA for December are as follows. The number of applications received was up 22.3% over November. The total applications on hand increased by 16.7%, and the number disposed of increased by 16.6% for a total of 2,752. Of these, 2,029 (73.7%) were approved. This increased the total eligible cases to 7,661, 3.7% above November. The 1,779 cases closed left 5,882 eligible cases continued to January. There were 7,683 GA recipients in December, which is 4.3% higher than November but 55.5% lower than December, 1980. The average grant per person (gross payments) was $214.53. This is $6.55 above November and $55.75 above December, 1980.

A result of the change in the restrictions on GA eligibility may be seen in the following table. The largest decreases occurred for caretakers in their 20s while those under 20 increased. Please use caution in applying these figures because the December, 1980 figures are underreported and the 1981 figures are overreported. The source of the data in this table is the Welfare Information System, whereas all other GA data is from the GA Summary of Abstract and Statistical Report.

General Assistance* Caretakers by Age Interval
December, 1980 and December, 1981

Age	December 1980	December 1981	Change	Percent Change

*Source - Minnesota Welfare Information System

After July, 1982's dramatic drop in GA and the continued decreases in subsequent months, December finally shows an increase. Had it not been for the restrictions imposed on eligibility in July, the current number of GA recipients undoubtedly would have been much closer to the 17,276 recipients there were one year ago. A similar GA participation might have been expected in light of the unemployment. According to the Department of Economic Security figures, Minnesota's unemployment rates were lower for the summer of 1981 than the summer of 1980 but increases since August have brought the December rate to 6.2%. This rate is the same as December 1980's rate but the number unemployed has increased by 2%. Following this kind of trend, it is not surprising to find an increase in GA recipients in December.

The increases in GA recipients and unemployment have not been uniform throughout the state. In the southeastern counties (Region 10), the number of GA recipients increased by 6.5% from October to November and then remained constant to December. The highest unemployment rates and the highest percentage increases in GA recipients have been in the northeastern counties (Region 3) and in the central counties (Regions 6 and 7). The number of GA recipients declined in the northwestern counties (Regions 1, 2, 4 and 5). The number of Twin City seven-county area (Region 11) GA recipients rose by 5.3% from November, but this is still 2.9% lower than October. The statewide increase in GA recipients was dominated by the SMSA counties which increased by 5.8% over November, while the total for non-SMSA counties declined slightly.

The increase in GA recipients from November to December occurred primarily in only two eligibility categories. Persons in battered women's shelters increased by 140 (39.5%) statewide. That increase was nearly all concentrated in the suburban (non-urban SMSA) counties. The other eligibility category which increased substantially was persons in rehabilitation facilities. Here the total reported** increased by 103 persons (11.2%). There were smaller increases in the other categories except for a decline of 40 persons (21.5%) lacking English language skills.

Medical Assistance (MA) - A decline of 11.5% in monthly expenditures resulted in total payments of $61,016,458 for December. The decrease was mainly due to the processing of two warrant cycles during the month, rather than the rare three cycles that were processed during November. In addition, November's payments covered 31 days of Nursing Home care, while December's payments included only 30 days.

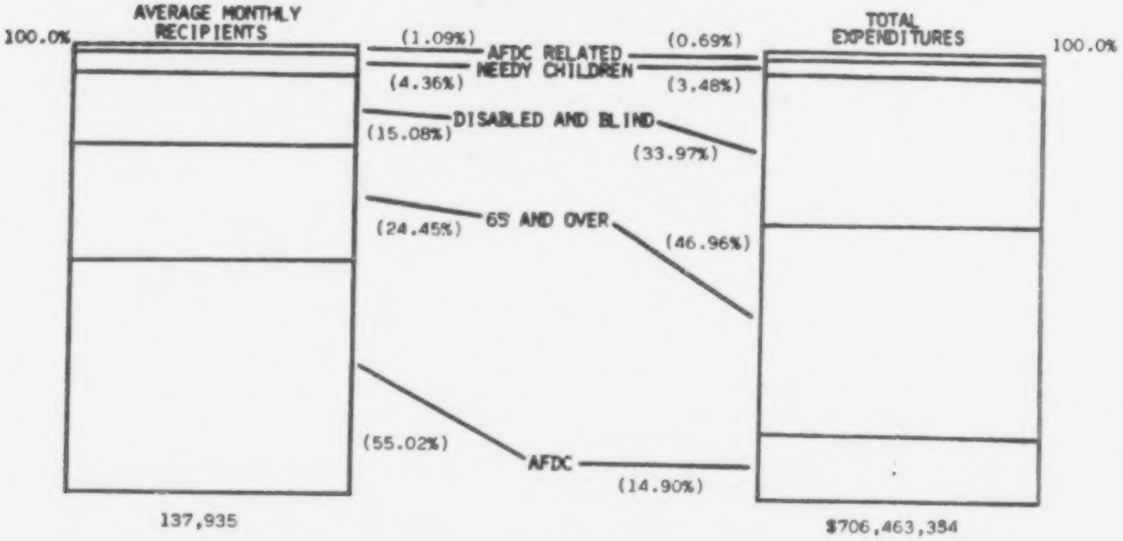
Similarly, the number of recipients was down 10.8% to 134,264 as a result of the difference in the number of warrant cycles processed.

Expenditures during calendar year 1981 were $706,463,334, representing an increase of 17.7%.

Computing an average of the annual expenditure shows that a typical recipient had $427 paid for monthly needs. However, an individual on AFDC received about $150, while a recipient of OAA received $820, and a recipient of AB/AD received $961. This is reflected in the following graphic comparison.

**Hennepin County does not report by eligibility category except for battered women's shelter care.

MEDICAL ASSISTANCE RECIPIENTS AND EXPENDITURES
BY BASIS OF ELIGIBILITY
CALENDAR YEAR 1981



Long-Term Care Costs - Because the cost of long-term care is such a major component of total MA expenditures, it is periodically given special emphasis in reporting, along with costs of ancillary care for recipients of long-term care.

Between CY 1976 and CY 1981, expenditures for MA have risen 115.2%. During the same period, expenditures for long-term care rose 143.0% and costs of ancillary services were up 138.0%. Thus, these expenditures are a greater factor in MA costs than they were in the past. The following table summarizes this cost data.

Medical Assistance Expenditures
Total with Long-Term Care and Ancillary Care
Calendar Years 1976-1981
(in Thousands)

Year	Total	Long-Term Care	% of Total	Ancillary Services	% of Total	Combined Percentage
1976	$328,277	$191,696	58.4	$19,339	5.9	64.3
1977	394,821	246,107	62.3	22,347	5.7	68.0
1978	438,269	276,541	63.1	28,779	6.6	69.7
1979	518,568	336,077	64.8	35,494	6.8	71.7
1980	600,400	393,186	65.5	41,385	6.9	72.4
1981	$706,463	$465,726	65.9	$46,024	6.5	72.4

As shown herein, the combined percentage for these categories was unchanged from CY 1980 to CY 1981. This may be due to the "cap" that is being applied to Ancillary Care, or it may simply represent a decline in per capita utilization of such services. A combination of these two factors is likely to provide the explanation.

PUBLIC ASSISTANCE PROGRAMS*

TOTAL	134,264	$61,016,458	$361,803,251

(1)This table represents state Medicaid system payments plus payments made by counties to primarily medical vendors not covered by the central payments system. Also, in this table, each person is counted under all service categories for which payment is made in his/her behalf during the month.

(2)Recipient recoveries represent collections such as estate settlements, tort recoveries, etc. ... generally third party collections which cannot be tied directly to a specific service billing. The dollar values under this category are always negative.

(3)An additional $9,283 was paid out for EPSDT services during the month; however, these charges were billed in a different fashion and are included under other service types such as Public Health Clinic, Physician/Osteopathic Services, etc. Existing reports do not break these charges out separately.

TECHNICAL NOTES

Table I	Application activity for the AFDC Program does not include applications for medical only needs.
Table II	Under MA, total Persons Concurrently Receiving AFDC are not included when calculating the total number of persons receiving assistance. This is done to unduplicate the total count since these people are already counted under the AFDC Program.
Table III	This table does not include cases and payments made under the Emergency Assistance Program.
Table IV	The sixteen (16) counties identified by the Census Bureau as metropolitan (i.e.; SMSA) are separated into urban and suburban. The urban counties are Hennepin, Ramsey, and St. Louis, and the suburban counties are the thirteen (13) other SMSA counties. These counties are noted (U) and (S) respectively. Two multi-county agencies are labelled as follows: F-M-W HSB includes Faribault, Martin, and Watonwan Counties; Region VIII North includes Lincoln, Lyon, and Murray Counties.
Tables V & VI	Medical Assistance - The program is broken into two components: (1) Those recipients who had a vendor payment made in their behalf and are not concurrently receiving a money payment (the MA-Only group). (2) Those recipients who are concurrently receiving a money payment (AFDC, SSI, MSA) and a medical vendor payment was also made in their behalf. The counts are of people in whose behalf a payment was made out of the State's Centralized Medical Payments System during the month specified.

GLOSSARY

AFDC-UB	AFDC UB . . . An unborn child is included under the definition of child in the AFDC Program and grants are determined accordingly. For this reason, we have counted them as recipients. It is possible for a case which is currently receiving money under another subprogram (such as Unemployed Father or Regular AFDC) to receive an additional amount due to the presence of an unborn child. In instances such as this, the unborn will appear in the child count, but there will be no case or caretaker count since they are carried under the other subprogram.
EPSDT	Early Periodic Screening and Diagnostic Treatment
GAMC	General Assistance Medical Care
HMO	Health Maintenance Organization
Nursing Home ICF-I	Intermediate Care Facility (High Care)
ICF-II	Intermediate Care Facility (Minimum Care)
ICF-MR	Intermediate Care Facility (Mentally Retarded)
OAA-CCR	Old Age Assistance Concurrently Receiving Supplemental Security Income
OAA-MAO	Old Age Assistance, Medical Assistance Only
P.T., O.T., S.T. Audiology in Nursing Home	Physical Therapy, Occupational Therapy, Speech Therapy
Podiatrist Service	Specializing in Foot Care Services
State Institution MR (ICF)	Mentally Retarded, Intermediate Care Facility
SMSA	Standard Metropolitan Statistical Area is a county or a group of contiguous counties which contain at least one city of 50,000 population. In addition to the county of counties containing such cities, contiguous counties are included in such areas if they are essentially metropolitan in character and are socially and economically integrated.

Minnesota
Aid to Families with Dependent Children
Unemployed Parents

Trend Analysis

History

Unemployment as a basis of eligibility for Aid to Families with Dependent Children (AFDC) was established by Congress, effective in 1961. At that time, only unemployment of the father was considered. In 1961, eight states adopted this eligibility factor in their state program. Almost 10 years later, the Minnesota Legislature approved this addition with the first payments made in August, 1970.

This program addition was established to provide financial assistance to families with children to prevent the family from breaking up as a result of a financial crisis because of unemployment. Initially, all families with an unemployed father with children under 18 years of age were eligible for AFDC. The 1967 amendments to the Social Security Act revised the definition of unemployment, restricting it to those persons with labor market experience, excluding those persons entering the labor market for the first time, or after a "long" absence from the labor market. In addition, a durational element of 30 days of unemployment was required before eligibility began. On November 1, 1976, an unemployed father could receive AFDC while receiving Unemployment Compensation (prior to that date, it was either one or the other); and, in 1979, AFDC eligibility could be based on unemployment of the mother making it an Unemployed Parent program.

The first five years of the Minnesota experience show relatively little use by the unemployed in the state. Very few of the nonmetropolitan counties reported applicants or recipients of AFDC because of unemployment of the father. The three large counties, Hennepin, Ramsey and St. Louis, accounted for almost all of the activity.

In the next six years, the story is quite different with the outstate counties reporting a steady increase in utilization, until the 1981 recession when substantial increases occurred. The following table presents the statewide trend in families aided and expenditures from fiscal year 1971 through fiscal year 1981:

Minnesota
Aid to Families with Dependent Children
Unemployed Parent Case Load and Costs
Fiscal Years 1971 through 1981

Fiscal Year Ending June 30th	Monthly Average Families	Utilization Rate*	Monthly Average Persons	Persons Per Family	Average Grant Per Person	Total Dollars
1971**	715	1.05%	3,363	4.71	$ 60.99	$ 2,461,383
1972	1,592	2.18	7,306	4.59	73.21	6,418,089
1973	1,697	2.33	7,739	4.56	75.47	7,009,008
1974	1,223	1.53	5,633	4.61	72.06	4,871,184

1981	3,671	3.06%	15,381	4.19	$104.98	$19,375,081

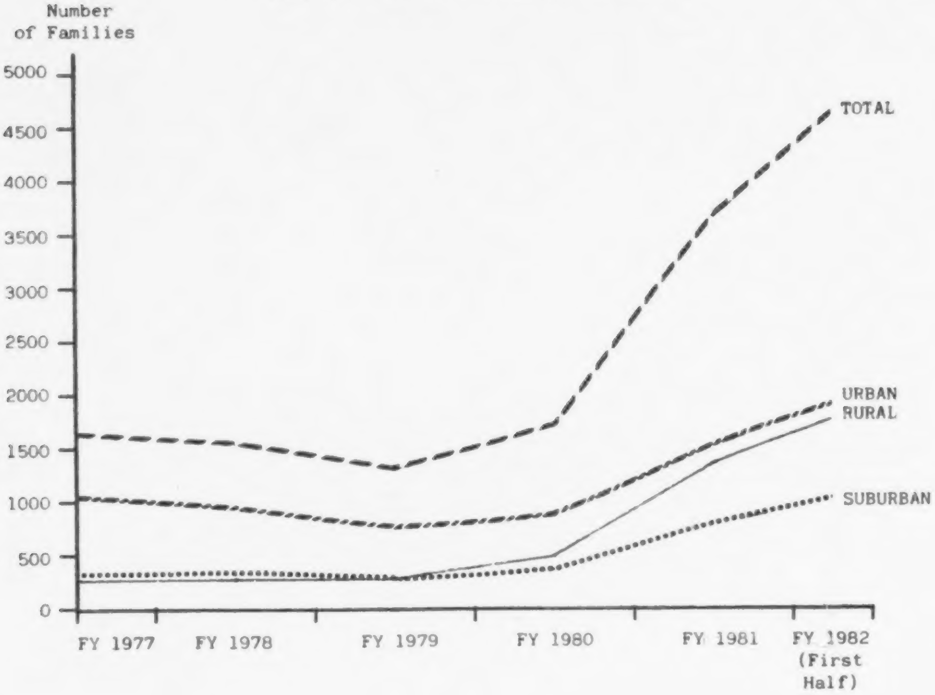
*Number of UP families per 100 unemployed. This relates the monthly average families for a fiscal year with the monthly average unemployment for the previous calendar year, assuming a six-month lag.

**Eleven months - August, 1970 through June, 1971.

During the 1975 recession, the statewide unemployment rate averaged 5.9% in both calendar years 1975 and 1976. In the current recession, the unemployment rate averaged 5.7% in calendar year 1980, and the preliminary figure for calendar year 1981 is 5.5%. The outlook for calendar year 1982 appears to indicate a continued rate at the same level which, if true, would indicate in turn that the current recession is lasting longer than the one five years ago.

Utilization of AFDC-UP during the 1975 recession was low even though the rate of unemployment was at about the same level then as now. The difference between the 1975 and 1981 recession is in the rural or agricultural areas of the state where unemployment is currently much higher. This is reflected in the recent growth in the AFDC-UP program since 1979. The following chart shows the trends since 1977 for the major areas in the state:

AFDC-Unemployed Parent
Average Monthly Case Load
Fiscal Years 1977 - 1982 (First Half)



The change in 1976 permitting the receipt of Unemployment Compensation benefits with AFDC-UP had only a minor effect on the trend since then. In December, 1981, 252 families, or 5.1% of the total AFDC-UP case load, were also receiving UC benefits.

The addition of the mother as an unemployed parent in 1979 appears also to have only a minor effect on case load trends. In June, 1980, there were 125 families in which the receipt of AFDC-UP was based on the unemployment of the mother. This was 5.1% of the total families aided.

Outlook for Fiscal Year 1983

Based on the trends to date, it appears that the current year (F.Y. 1982) will show an expenditure level of 29.7 million dollars for a monthly average of 5,335 families receiving UP. Minnesota unemployment in calendar year 1981 is expected to average about the same level as 1980. This means that the utilization rate for UP families will show a significant increase to 4.5%.

Unless there is an abrupt "turnaround" for the Minnesota economy, it appears that the utilization rate will continue upward with a minimum rate of 5% of the unemployed using AFDC-UP in F.Y. 1983. This would produce a minimum case load of 6,000 families per month, resulting in a cost of 35 million dollars for the year.

January, 1982 in Summary

All Programs The number of persons receiving assistance declined slightly (-0.3%) from December and by 14,785 (-6.5%) from January, 1981. The annual trend is attributable to changes in General Assistance and AFDC eligibility made during July and August, 1981.

Overall expenditures were down $2,032,134 (-2.5%) from December, 1981 but increased by $4,630,053 (+6.2%) over January, 1981. Medical Assistance expenditures are responsible for both trends.

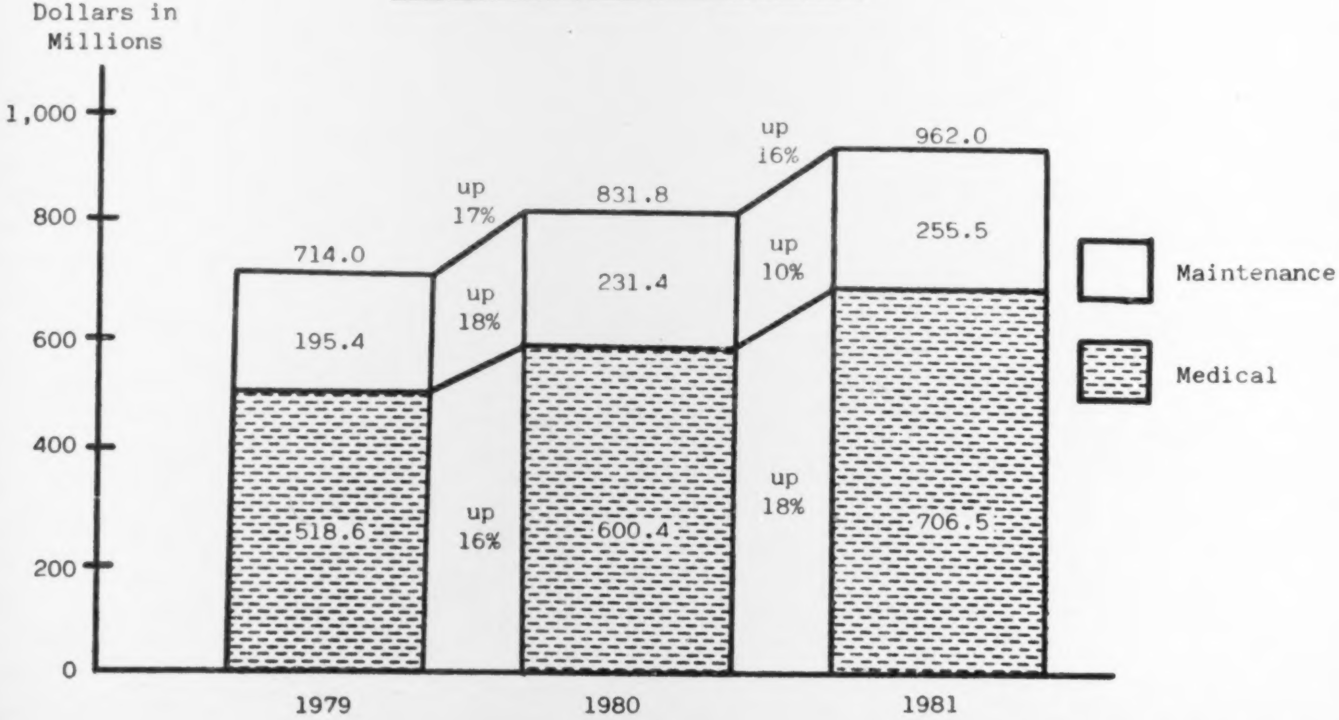
Expenditures for nursing home care increased by $1,393,433 (+4.1%) over December, largely because of payment for December's 31 days. This increase was more than offset by decreases in other Medical Assistance expenditures, especially payments made on behalf of AFDC recipients, which declined $1,844,300 (-21.1%) from December. Total Medical Assistance expenditures declined $2,476,130 (-4.1%) from December.

Medical Assistance expenditures increased by $5,767,148 (+10.9%) over January, 1981, including an increase of $5,118,508 (+16.9%) for nursing home payments. This accounts for the entire increase in overall expenditures over January, 1981.

* * *

Total expenditures for calendar year 1981 amounted to $962,002,198, 16% above 1980. Costs were higher due to a larger case load which was the result of the recession. Note that the annual advance in Maintenance costs is smaller than the growth of the Medical component.

Public Assistance Expenditures
Maintenance and Medical
Calendar Years 1979 through 1981

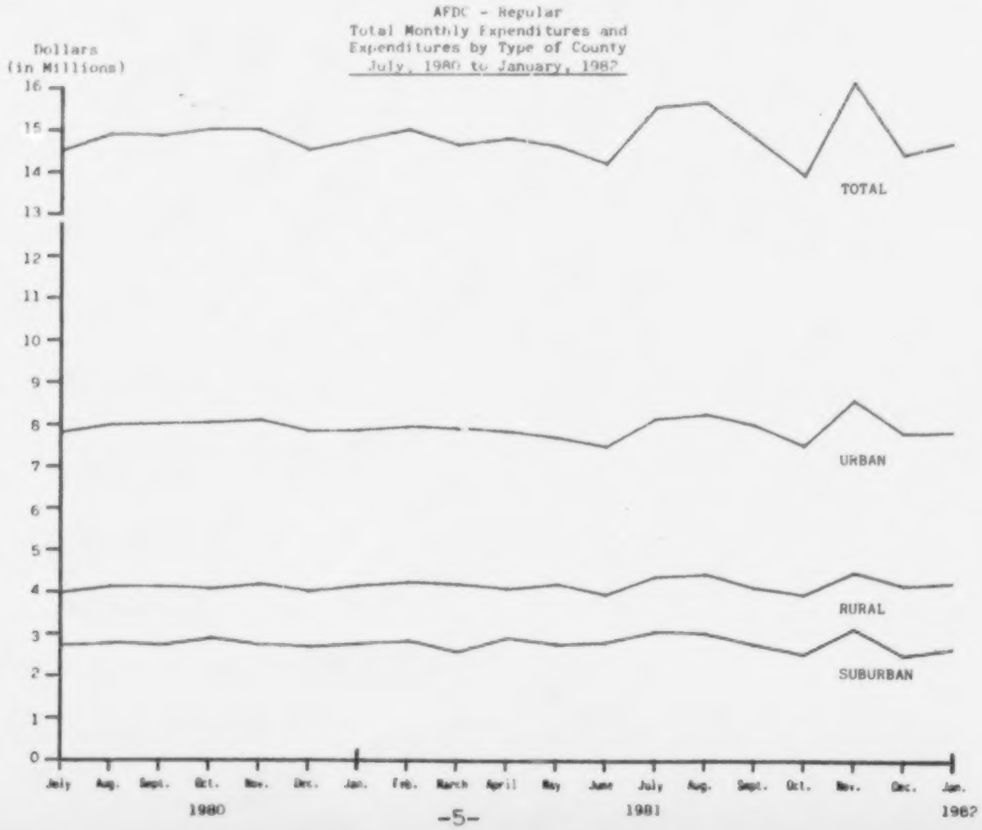


Aid to Families with Dependent Children (AFDC) Net maintenance payments in January, 1982 totalled $17,548,288, up $459,982 (2.7%) above December, 1981 and $127,968 (0.7%) greater than in January, 1981. Increases were evident in all county categories, ranging from a low of 2.3% for the urban to 6.9% for the suburban with the rural lying in between at 3.5%. The Regular and Unemployed Parent segments reflected payment advances of 1.9% and 8.3% respectively. The monthly increase can be traced to a reduction in IV-D collections and increased payments to Unemployed Parent cases.

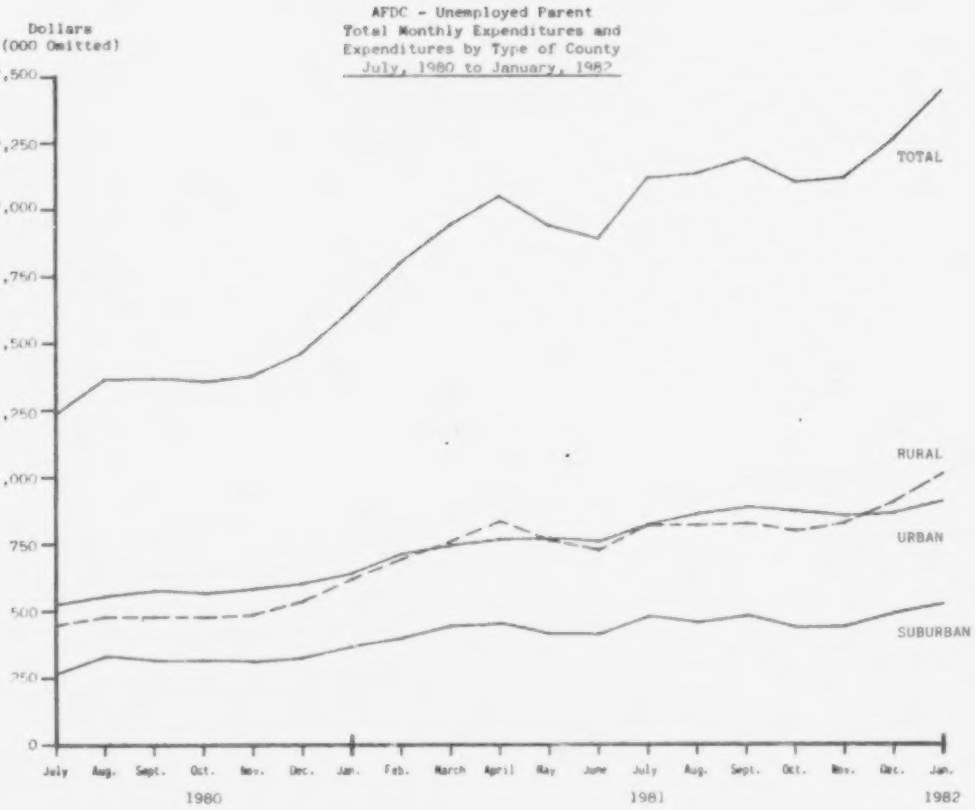
Support collections were $1,439,087, a decline of $344,752 (19.3%) below December, 1981 and $91,974 (6.8%) above January, 1981. The current month's support collections were the lowest since February, 1981. The decline ranged from a low of -4.8% in the rural counties to a high of -29.1% in the suburban counties with the urban counties recording -19.1%.

Cases receiving payment totalled 50,329, an increase of 218 (0.4%) above December, 1981, but 4,142 (7.6%) below January, 1981. The entire case advance occurred within the Unemployed Parent segment, which grew an additional 385 (7.8%) cases. Declines were recorded for the Regular segment [-151 (0.3%)] and for the Unborn Only category [-16 (1.4%)]. In January, the rural counties experienced the fastest rate of growth in Unemployed Parent cases, rising 233 (12.0%). Increases of 69 (3.6%) occurred for the urban counties and 83 (7.9%) for the suburban counties. The rural counties now encompass 40.8% of the total Unemployed Parent case load compared to 36.9% in January one year ago. The annual decrease in case load represents decreases caused by the termination of most cases with stepparents during August, 1981 and the transfer of AFDC Foster Care cases to Title IV-E, offset by increases in Unemployed Parent cases.

The graphs which follow show the change in monthly payments for the Regular and Unemployed Parent categories between July, 1980 and January, 1982.



AFDC - Regular
Total Monthly Expenditures and
Expenditures by Type of County
July, 1980 to January, 1982



AFDC - Unemployed Parent
Total Monthly Expenditures and
Expenditures by Type of County
July, 1980 to January, 1982

Approvals declined 489 (13.1%) below December, 1981 to 3,236 cases. The change was 384 (10.6%) cases under January, 1981. Reopened cases represented 49.0% of the approvals compared to 48.9% in the previous month. Declines in approvals within county type were suburban -201 (17.7%), urban -169 (13.1%) and rural -119 (9.1%).

January, 1982 closings jumped to 5,396, an increase of 2,107 (64.1%) over December, 1981 and were 2,520 (87.6%) greater than in January, 1981. The sharp rise in closings is the result of the State Legislature's completion of the alignment of the Minnesota AFDC Program with the federally mandated changes contained in the 1981 Omnibus Budget Reconciliation Act. These changes become effective on February 1, 1982. For every case opened, 1.67 cases were closed.

Emergency Assistance (EA) This program retreated during January in cases, recipients and payments. This is the fifth consecutive month of case and recipient decline and the seventh month of decreasing expenditures. Fewer AFDC families requiring assistance influenced state totals during January. The change within the AFDC segment represented 93.4% of the case load decline and 84.6% of the expenditure reduction.

Recipients numbered 2,800 during January. This was 485 (14.8%) below December's total and 1,186 (29.8%) under one year ago. The AFDC segment represented 60.7% of all recipients during January, which is slightly under the 62.4% recorded last year.

January's case load totalled 784, which represents a decline of 152 (16.2%) from December and is 396 (33.6%) under January, 1980. Approximately 66% of January's case load required assistance because of Eviction, No Employment or Emergency Fuel in contrast to the 73% recorded by this group one year ago.

Expenditures reached $214,495 during the month. This is a reduction of $38,889 (15.3%) from December and is $86,388 (28.7%) less than one year ago. The emergencies Eviction, Utilities and Other (Ramsey County included) were $44,018 under their December total. However, the influence of these emergencies was partially mitigated by increases because of Fire, Illness, Death, Migrant Family and a $3,883 (41.5%) advance in Emergency Fuel Assistance.

Minnesota Supplemental Aid (MSA) This program set a new expenditure record during January. Despite a receding case load, payments once again buffeted the million dollar mark.

In January, 10,209 persons received assistance. This was 5 (.05%) fewer than December and 284 (2.7%) under one year ago. Monthly expenditures by contrast advanced $20,195 (2.1%) to $996,691, thereby shattering the previous record of $996,107 set in June of 1981. January's payments in retrospect were $39,798 (4.2%) more than recorded one year ago.

The average grant during the month reached $97.63. This occurred because, once again, all categories were at moderately high payment levels. This can be observed in the table below which shows the change in average grants since July, 1981. The Aged category exhibited the most obvious advance, rising $6.11 (9.1%) from the previous month. However, this is deceptive since December's payments were influenced by numerous refunds and cancellations within the Aged category. These lowered the Aged payment level and grant average and held down December's total program costs. Once, Aged payments rebounded to normal levels and, coupled with a slight advance in Disabled costs, a new record was set.

MSA
Average Monthly Payments
by Category of Service
July, 1981 through January, 1982

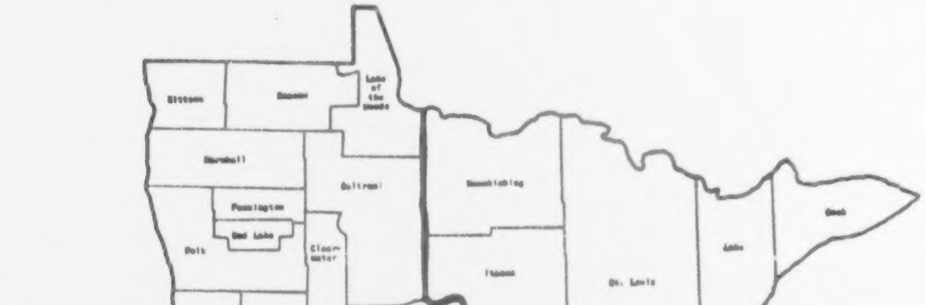
Category	January	December	November	October	September	August	July	Change July to January $	Change July to January %
Aged	$ 73.00	$ 66.89	$ 73.42	$ 73.67	$ 74.31	$ 71.97	$ 71.92	$1.08	1.5%
Blind	84.66	80.65	84.04	89.90	83.85	96.06	86.50	- 1.84	2.1%
Disabled	$108.12	$107.83	$104.46	$104.39	$105.29	$105.86	$101.49	$6.63	6.5%
Total	$ 97.63	$ 95.60	$ 95.13	$ 95.14	$ 95.92	$ 95.84	$ 92.57	$5.06	5.5%

General Assistance (GA) The total number of persons receiving GA for January, 1982, was 7,699. This is 16 (0.2%) more than December, 1981, and 10,510 (57.7%) less than January, 1981. The average grant (gross dollars) per person for January, 1982, was $214.44. This is $.09 (<0.1%) less than December, 1981, and $56.86 (36.1%) more than January, 1981.

Application activity decreased compared to December. The number of applications received was 5.7% lower and the total applications on hand decreased by 3.5%. The number of applications disposed of decreased by 4.9% to 2,617. Of these, 1,985 (75.9%) were approved.

The 1,985 cases added in January brought the total cases eligible to 7,867. This was an increase of 2.7% compared to December. Payments were made for 6,559 (83.4%) of the eligible cases. There were 1,523 cases closed which left 6,344 eligible cases continued to February.

Percent Change in GA Recipients
from December 1981 to January 1982
by Area of the State



The area changes in GA recipients shown on the preceding map combine to produce a statewide increase of only 0.2% above December 1981. Going into the winter months has usually meant a more substantial increase in GA recipients. For example, there was a 5.4% increase from December 1980 to January 1981 and that was followed by two increases of 2.7% from January to February and from February to March of 1981. This year, however, with GA eligibility largely restricted to persons with specific employment barriers, it is expected that seasonal and labor-market-related trends will have less effect on GA.

The current trends are shown in the following two tables by area of the state. Note that the number of northeastern county recipients dropped by a lesser percentage from January 1981 to January 1982. This seems to go hand in hand with more moderate increases in average payments. The Twin City area shows the largest increase in average payment from one year ago.

GA Trends by Area of the State
July 1980 - January 1982

Recipients

	Southeast	Southwest	Twin City	Central	Northeast	Northwest	Totals

Medical Assistance (MA) This marks the third year that recipients and expenditures have been down in January compared to December. While this was partially a result of having three warrant cycles in December for each of the previous two years, no such explanation is applicable. The greatest portion of the month-to-month decline was from decreased utilization by recipients concurrently receiving AFDC. This was also a factor in the preceding two years.

The number of recipients was 7.0% lower than December. This decline of 9,426 recipients left a total of 124,838 in January. This was 5.4% or 7,114 below last January.

Similarly, expenditures were down from last month, but only 4.1%, totalling $58,540,329. However, there was a 10.9% increase from one year ago, due to higher expenditures per recipient.

The average monthly expenditure per recipient rose 3.2% from December, attaining a level of $468.93. This represents an increase of 17.3% from one year ago.

The following graph exhibits the fluctuations in the numbers of the Aged receiving Medical Assistance Only for Calendar Years 1978 - 1981. The general upward trend is clear, and it is underscored by noting the average monthly number of recipients during each of the four years. The averages were: 22,158 for 1978, 22,586 for 1979, 24,176 for 1980, and 25,280 for 1981.

TOTAL	124,838	$58,540,329	$420,343,580

(1) This table represents state Medicaid system payments plus payments made by counties to primarily medical vendors not covered by the central payments system. Also, in this table, each person is counted under all service categories for which payment is made in his/her behalf during the month.

(2) Recipient recoveries represent collections such as estate settlements, tort recoveries, etc. ... generally third party collections which cannot be tied directly to a specific service billing. The dollar values under this category are always negative.

(3) An additional $1,570 was paid out for EPSDT services during the month; however, these charges were billed in a different fashion and are included under other service types such as Public Health Clinic, Physician/Osteopathic Services, etc. Existing reports do not break these charges out separately.

**Includes Lincoln, Lyon and Murray Counties.

***Includes Faribault, Martin and Watonwan Counties.

TECHNICAL NOTES

Table I	Application activity for the AFDC Program does not include applications for medical only needs.
Table II	Under MA, total Persons Concurrently Receiving AFDC are not included when calculating the total number of persons receiving assistance. This is done to unduplicate the total count since these people are already counted under the AFDC Program.
Table III	This table does not include cases and payments made under the Emergency Assistance Program.
Table IV	The sixteen (16) counties identified by the Census Bureau as metropolitan (i.e.; SMSA) are separated into urban and suburban. The urban counties are Hennepin, Ramsey, and St. Louis, and the suburban counties are the thirteen (13) other SMSA counties. These counties are noted (U) and (S) respectively. Two multi-county agencies are labelled as follows: F-M-W HSB includes Faribault, Martin, and Watonwan Counties; Region VIII North includes Lincoln, Lyon, and Murray Counties.
Tables V & VI	The Medical Assistance Program is broken into two components: (1) Those recipients who had a vendor payment made in their behalf and are not concurrently receiving a money payment (the MA-Only group). (2) Those recipients who are concurrently receiving a money payment (AFDC, SSI, MSA) and a medical vendor payment was also made in their behalf. The counts are of people in whose behalf a payment was made out of the State's Centralized Medical Payments System during the month specified.

GLOSSARY

AFDC-UB	AFDC UB . . . An unborn child is included under the definition of child in the AFDC Program and grants are determined accordingly. For this reason, we have counted them as recipients. It is possible for a case which is currently receiving money under another subprogram (such as Unemployed Father or Regular AFDC) to receive an additional amount due to the presence of an unborn child. In instances such as this, the unborn will appear in the child count, but there will be no case or caretaker count since they are carried under the other subprogram.
EPSDT	Early Periodic Screening and Diagnostic Treatment
GAMC	General Assistance Medical Care
HMO	Health Maintenance Organization
Nursing Home ICF-I	Intermediate Care Facility (High Care)
ICF-II	Intermediate Care Facility (Minimum Care)
ICF-MR	Intermediate Care Facility (Mentally Retarded)
OAA-CCR	Old Age Assistance Concurrently Receiving Supplemental Security Income
OAA-MAO	Old Age Assistance, Medical Assistance Only
P.T., O.T., S.T. Audiology in Nursing Home	Physical Therapy, Occupational Therapy, Speech Therapy
Podiatrist Service	Specializing in Foot Care Services
State Institution MR (ICF)	Mentally Retarded, Intermediate Care Facility
SMSA	Standard Metropolitan Statistical Area is a county or a group of contiguous counties which contain at least one city of 50,000 population. In addition to the county of counties containing such cities, contiguous counties are included in such areas if they are essentially metropolitan in character and are socially and economically integrated.
TB	Tuberculosis

TECHNICAL NOTES 29

GLOSSARY 30

February, 1982 in Summary

All Programs The number of recipients declined by 2,437 (-1.1%) compared with January and by 19,765 (-8.5%) compared with February, 1981. The monthly trend results from a reduction in the number of AFDC recipients due to the initial implementation of the Omnibus Budget Reconciliation Act, offset by increases in Medical Assistance and General Assistance recipients. The annual trend reflects changes in General Assistance and AFDC eligibility which were effective in July and August, 1981, plus February's reduction in AFDC recipients.

Total expenditures rose $1,825,030 (+2.3%) over January and by $5,555,303 (+7.4%) over February, 1981. The monthly trend closely matches a monthly increase of $1,895,525 in Medical Assistance expenditures. The annual trend results from an increase of $7,317,122 in Medical Assistance expenditures, offset by decreases of $1,261,737 in General Assistance and $531,593 in AFDC expenditures.

The monthly increase in Medical Assistance expenditures is not significant because it is due chiefly to the processing of a backlog of Outpatient Hospital claims. The annual increase of $7.3 million results primarily from a $5.2 million increase in nursing home expenditures (+16.9% over February, 1981) and a $1.1 million increase in payments to state institutions.

Aid to Families with Dependent Children (AFDC) February's data reflect partial initial implementation of the federal Omnibus Budget Reconciliation Act of 1981. Only partial impact occurred in February because local agencies had very limited time to implement changes which were effective legally on February 1.

Cases declined by 2,294 (-4.6%) from January, 1982. All segments of the program decreased, with the exception of Unemployed Parent, which continued to show a marked increase. A further reduction in cases is anticipated for March, after counties are able to implement fully the February 1 changes. The following table shows the changes in number of cases by segment for February over January, 1982 and February, 1981:

		Change From	
	February, 1982	January, 1982	February, 1981
Regular	41,706	-2,210 (- 5.0%)	-6,828 (-14.1%)
Unemployed Parent	5,575	+ 255 (+ 4.8%)	+1,439 (+34.8%)
Unborn Only	754	- 339 (-31.0%)	- 576 (-43.3%)
Unborn Concurrent	408*	- 224 (-33.3%)	- 261 (-36.8%)

*Unborn Concurrent cases are counted in the Regular segment also.

Net maintenance payments totalled $17,384,444, declining $163,844 (-0.9%) below January, 1982 and $531,593 (-3.0%) below February, 1981. (Normally, February's payments tend to rise between 2.0% and 3.5% beyond January's costs, as has happened for the past several years.) The suburban counties recorded a decrease in costs of 2.4% followed by the rural counties with 1.5% and the urban counties with less than 0.1% compared with January, 1982.

Overall, costs diminished less than the number of cases, especially in the urban counties. Two facts are known to have contributed to this discrepancy: cases terminated tended to be those with small grants; and in Hennepin County cancellations for cases which have their grants reduced after checks are printed are not reflected until the following month.

Approvals (3,209) declined by only 27 (0.8%) over the previous month and rose 27.3% above February one year ago. Contrasted with February, 1981, approval increments in rank order by county type were rural 30.1%, urban 26.4%, and suburban 25.2%. Reopenings comprised 53.8% of the total approvals compared with 49.0% in January, 1982 and 39.9% in February, 1981. In the current month, the urban and suburban counties each reported 55.6% of their approvals as reopened, whereas the rural counties' rate was 50.5%. The Unemployed Parent approvals represented 25.3% of the total approved cases contrasted with 22.1% for February, 1981. The three reasons of continued absence of a responsible or supporting household member resulting in support being terminated or reduced, loss or reduction of employment of the responsible or supporting household member living in the home due to layoff, discharge, or her/his own initiative and case reopened as client returned eligibility review or fulfilled other program requirements applied toward 88.1% of the total approved cases.

February, 1982 closings numbered 5,187, down 209 (-3.9%) from January, 1982 and up 2,866 (+123.5%) from February, 1981. Of the total closings, 2,744 (52.9%) were the result of federal changes. Gross earnings exceeding 150% of standard of need were responsible for 2,251 closings. For every case opened, there were 1.62 cases closed.

Emergency Assistance (EA) More AFDC and non-AFDC families requiring assistance during February caused this program to advance along all program parameters--cases, recipients and payments.

Recipients totalled 3,194 in February. This was 154 (19.6%) higher than January's level but 155 lower than one year ago. The greatest recipient increase occurred in the non-AFDC category, which advanced by 256 persons (22.3%). This was considerably higher than the growth within the AFDC category of 138 cases (8.4%). Total cases advanced by 154 (19.6%) from January to 938, which is 155 (14.2%) fewer than one year ago.

The four most common emergencies, Eviction from Shelter, No Employment, Utilities and Emergency Fuel together represented 80.6% of February's expenditures. One year ago, they were 61.8%. The greatest change from one year ago occurred within the Utility category. Here, the number of families increased by 170 (154.5%) while expenditures grew by $45,690 (182.9%). Eviction, though affecting the same number of families as last year, recorded an expenditure increase of $25,545 (25.2%). Perhaps this change reflects rental increases during the past year.

February's expenditure was $276,800, an increase of $62,305 (29.0%) from January and $8,288 (3.1%) more than one year ago.

Minnesota Supplemental Aid (MSA) This program was marked by lower recipient and expenditure levels during February. Recipients totalling 10,139 were 70 (0.7%) less than January and 272 (2.6%) fewer than one year ago. Expenditures totalled $980,800. This was 15,891 (1.6%) less than January, a record month and, in retrospect, was $23,223 (2.4%) more than February, 1981.

The Aged category represented 82.9% of the case load decline while the Disabled category accounted for all of the expenditure change. Declines within the Aged category outnumbered the advances by a margin of nearly three to one.

The average grant was $96.74 during February, the second highest on record. This was $4.76 (5.2%) higher than one year ago. Average monthly payments are strongly influenced by the high cost of care in board and care facilities. During February, 1,853 (18.5%) of the MSA recipients received this type of care. Cost totalled $553,252 or $298.57 per recipient.

The table below shows the change in recipients and expenditures that occurred in the Board and Care category between calendar years 1980 and 1981.

MSA
Board and Care
Average Monthly Recipients and Expenditures
and Cost Per Recipient
Calendar Years 1981 and 1980 Compared

	1981	1980	Percent of Change
Recipients	1,871	1,918	- 2.4%
Expenditures	$540,352	$500,701	+ 7.9%
Average Cost Per Recipient	$288.77	$261.11	+10.6%

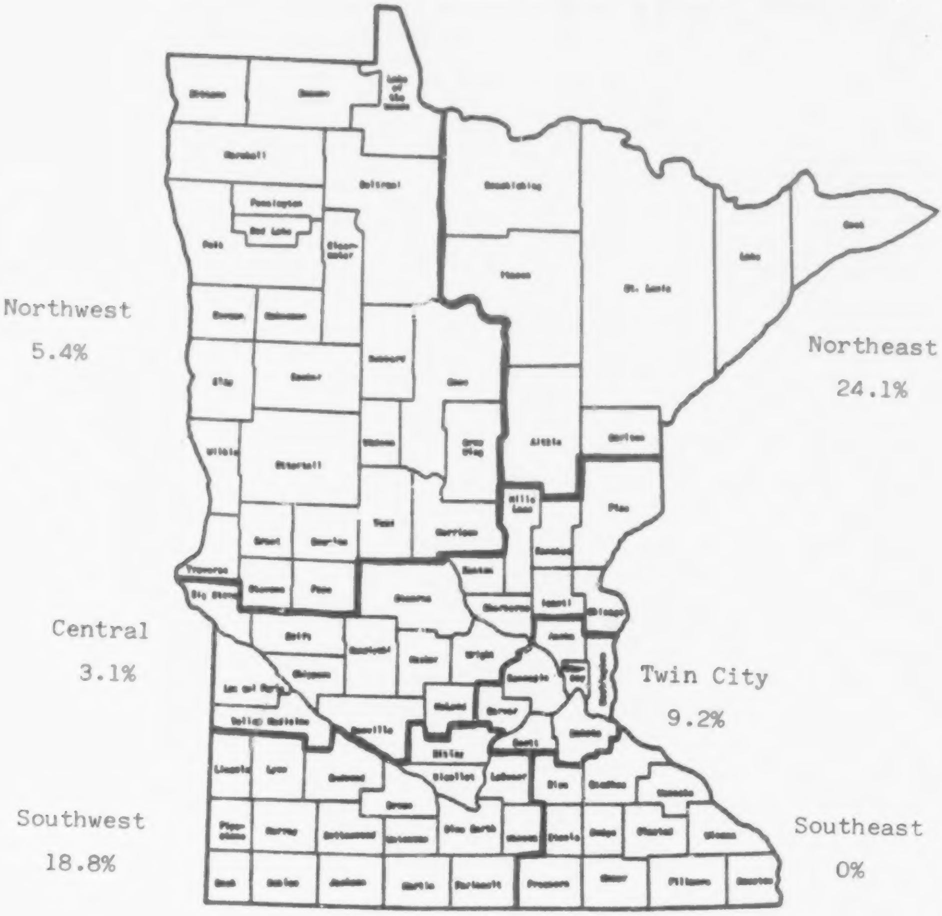
It should be noted that the cost for board and care is determined through negotiated rates. The 10.6% increase represents the yearly advance for this care category.

General Assistance (GA) The total number of persons receiving GA for February, 1982, was 8,595. This is 896 (11.6%) more than January, 1982, and 10,099 (54.0%) less than February, 1981. The average grant (gross dollars) per person for February, 1982, was $197.54. This is $16.90 (7.9%) less than January, 1982, and $39.22 (24.8%) more than February, 1981.

Application activity decreased compared to January. The number of applications received was 3.4% lower and the total applications on hand decreased by 2.1%. The number of applications disposed of increased by 0.3% to 2,626. Of these, 2,030 (77.3%) were approved.

The 2,030 cases added in February brought the total cases eligible to 8,374. This was an increase of 6.4% compared to January. Payments were made for 6,980 (83.4%) of the eligible cases. There were 2,258 cases closed which left 6,116 eligible cases continued to March.

Percent Change in GA Recipients
from January to February, 1982
by Area of the State



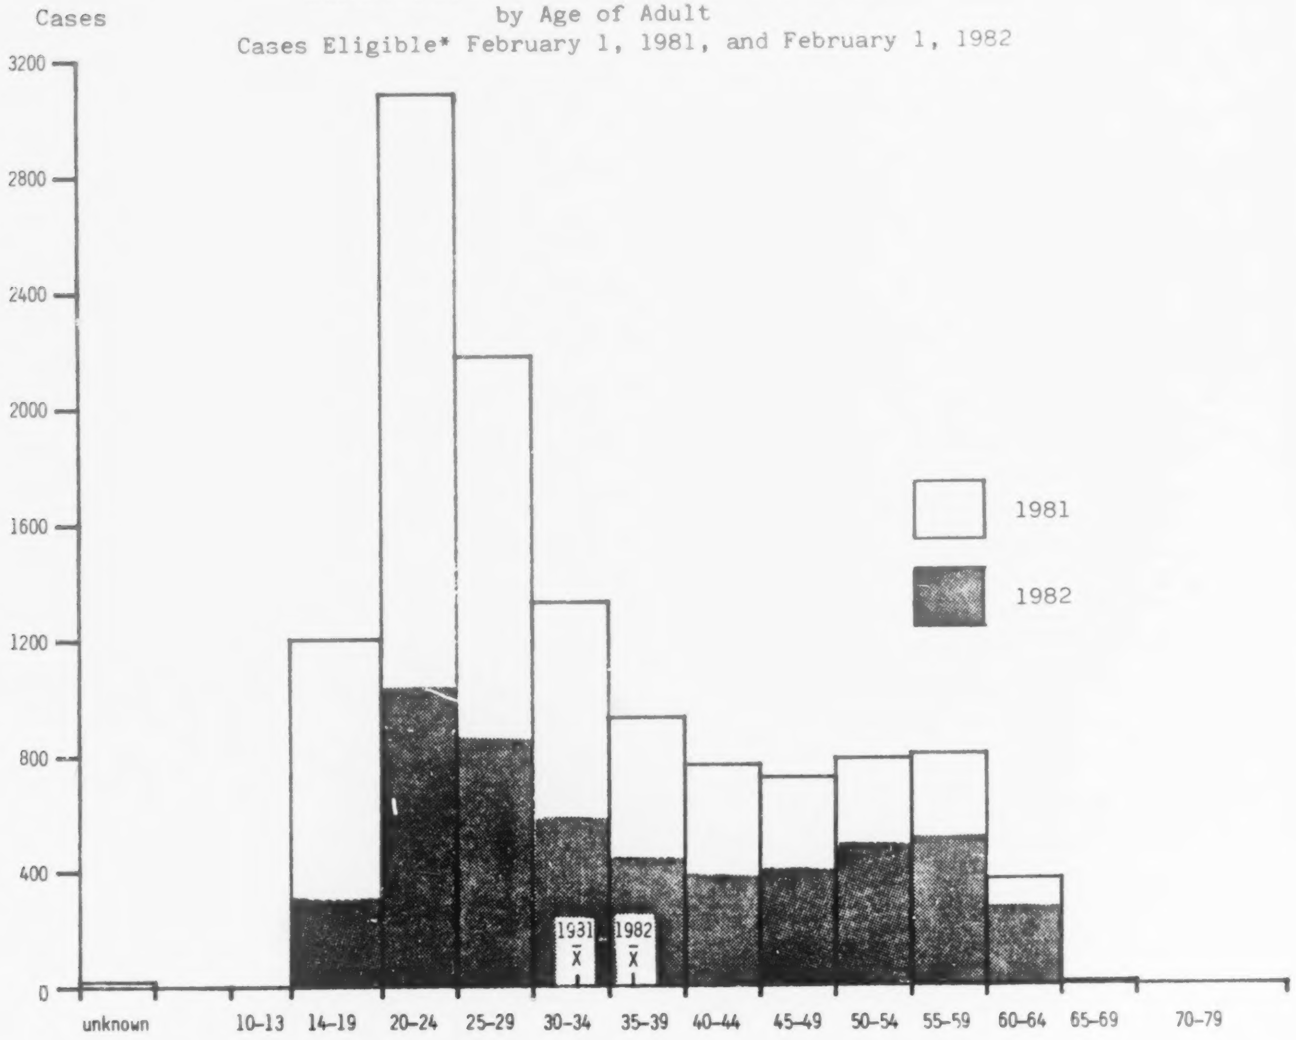
The average grant per person dropped to lower than it has been since August. Increases in recipients were greater than increases in payments, indicating an increase in lower payment cases. This change occurred in the urban and rural counties but not in the suburban counties. In the suburban counties, there was a drop in average grant in the family cases, but the average went up in the single person cases.

Changes in GA participation by eligibility type are not easily seen. The second largest source of additional GA recipients in the state was for other than battered women's shelter persons in Hennepin County. Since Hennepin does not report any finer breakdown, other considerations of participation by eligibility type must exclude Hennepin. (Hennepin accounts for about 35% of the state's GA recipients.) In the remaining counties, the largest increase over January was in recipients who lack marketable job skills. The increases for the other eligibility types were considerably less.

Changes in the age of GA recipients may be seen in the following chart. This chart shows GA cases by the age of an adult recipient. This person is the one identified as "person one" in the Welfare Information System (WIS). Although the WIS data is of value here, it should be noted that it is incomplete. About one-sixth of the cases with eligibility continuing into the following month were not included on the WIS. This may bias the results because cases which are open for a short duration are less likely to be recorded in the system.

The chart depicts a substantial decrease in adults in the early 20s. The average age increased by 3.6 years from 32.9 to 36.5. The average age for families with adults only increased by 4.7 years and the age distribution has become more strongly bimodal--peaking at 20-24 years and at 55-59 years. The average age for families with children decreased by 1.8 years. Single person cases, comprising 949 of all cases, clearly dominated the distributions shown in the chart. The average age for this group increased by 3.8 years.

Distribution of General Assistance Cases
by Age of Adult
Cases Eligible* February 1, 1981, and February 1, 1982



*Source: Minnesota Welfare Information System

Medical Assistance (MA) The number of recipients in February rose to 135,569. This increase of 8.6% from January's level represented 10,731 recipients. However, there was a decline of 1.2% in the number of recipients compared to one year ago, a decrease of 1,677 recipients.

The month's expenditure of $60,435,854 for MA was 3.2% higher than last month, but 13.8% above February of last year. The resulting average of $445.79 per recipient was down 4.9% from January, but up 15.2% from one year ago.

Outpatient Hospital payments accounted for 87% of the increase in monthly expenditures. Payment of Outpatient Hospital claims had been suspended for several weeks during December and January because of pending litigation. This caused low levels of Outpatient Hospital payments in December and January, followed by a large increase in February when the backlog of claims began to be processed.

Last month, a graph was included in this report to depict aged recipients of Medical Assistance Only for the past four calendar years. A similar graph is presented here to show all recipients of MA for the same four years. No pattern is visible in this graph, but it does show the growth trend that has occurred since 1979. The average monthly number of recipients dropped from 119,670 in 1978 to 117,889 in 1979. Then, it jumped to 128,852 during 1980 and grew to 137,935 for 1981.

TOTAL	135,569	$60,435,854	$480,779,434

(1)This table represents state Medicaid system payments plus payments made by counties to primarily medical vendors not covered by the central payments system. Also, in this table, each person is counted under all service categories for which payment is made in his/her behalf during the month.

(2)Recipient recoveries represent collections such as estate settlements, tort recoveries, etc. ... generally third party collections which cannot be tied directly to a specific service billing. The dollar values under this category are always negative.

(3)An additional $9,140 was paid out for EPSDT services during the month; however, these charges were billed in a different fashion and are included under other service types such as Public Health Clinic, Physician/Osteopathic Services, etc. Existing reports do not break these charges out separately.

*May not add due to rounding.
**Tncludes Lincoln, Lyon and Murray Counties.
***Includes Faribault, Martin and Watonwan Counties.

TECHNICAL NOTES

Table I	Application activity for the AFDC Program does not include applications for medical only needs.
Table II	Under MA, total Persons Concurrently Receiving AFDC are not included when calculating the total number of persons receiving assistance. This is done to unduplicate the total count since these people are already counted under the AFDC Program.
Table III	This table does not include cases and payments made under the Emergency Assistance Program.
Table IV	The sixteen (16) counties identified by the Census Bureau as metropolitan (i.e.; SMSA) are separated into urban and suburban. The urban counties are Hennepin, Ramsey, and St. Louis, and the suburban counties are the thirteen (13) other SMSA counties. These counties are noted (U) and (S) respectively. Two multi-county agencies are labelled as follows: F-M-W HSB includes Faribault, Martin, and Watonwan Counties; Region VIII North includes Lincoln, Lyon, and Murray Counties.
Tables V & VI	The Medical Assistance Program is broken into two components: (1) Those recipients who had a vendor payment made in their behalf and are not concurrently receiving a money payment (the MA-Only group). (2) Those recipients who are concurrently receiving a money payment (AFDC, SSI, MSA) and a medical vendor payment was also made in their behalf. The counts are of people in whose behalf a payment was made out of the State's Centralized Medical Payments System during the month specified.

GLOSSARY

AFDC-UB	AFDC UB . . . An unborn child is included under the definition of child in the AFDC Program and grants are determined accordingly. For this reason, we have counted them as recipients. It is possible for a case which is currently receiving money under another subprogram (such as Unemployed Father or Regular AFDC) to receive an additional amount due to the presence of an unborn child. In instances such as this, the unborn will appear in the child count, but there will be no case or caretaker count since they are carried under the other subprogram.
EPSDT	Early Periodic Screening and Diagnostic Treatment
GAMC	General Assistance Medical Care
HMO	Health Maintenance Organization
Nursing Home ICF-I	Intermediate Care Facility (High Care)
ICF-II	Intermediate Care Facility (Minimum Care)
ICF-MR	Intermediate Care Facility (Mentally Retarded)
OAA-CCR	Old Age Assistance Concurrently Receiving Supplemental Security Income
OAA-MAO	Old Age Assistance, Medical Assistance Only
P.T., O.T., S.T. Audiology in Nursing Home	Physical Therapy, Occupational Therapy, Speech Therapy
Podiatrist Service	Specializing in Foot Care Services
State Institution MR (ICF)	Mentally Retarded, Intermediate Care Facility
SMSA	Standard Metropolitan Statistical Area is a county or a group of contiguous counties which contain at least one city of 50,000 population. In addition to the county of counties containing such cities, contiguous counties are included in such areas if they are essentially metropolitan in character and are socially and economically integrated.

VII. Supplemental Security Income and Supplemental Aid by County: March, 1982 27-28

TECHNICAL NOTES 29

GLOSSARY 30

March, 1982 in Summary

All Programs The total of public assistance recipients declined by 6,672 (3.2%) compared with February, because of changes in AFDC eligibility which were effective February 1. Compared with March, 1981, the number of recipients was down 29,647 (12.6%). Of this reduction, 43% (approximately 12,700 recipients) can be assigned to the February 1 AFDC changes. The balance of the reduction is attributable to eligibility restrictions in General Assistance and AFDC which took effect in July and August, 1981.

Expenditures in March were $80,194,935, $580,853 (0.7%) below February but $8,031,414 (11.1%) above March, 1981. The monthly trend resulted from a decrease of $1.1 million in AFDC expenditures offset by increases in Medical Assistance and the other programs. The annual trend represents an increase of $10.7 million in Medical Assistance expenditures, offset by decreases of $1.4 million each in AFDC and General Assistance. The annual increase in Medical Assistance costs resulted primarily from increased payments to nursing homes ($5.3 million) and for inpatient hospital services ($3.2 million).

Aid to Families with Dependent Children (AFDC) During March, 1982, this program continued to contract in response to full initial implementation of federal eligibility restrictions (Omnibus Budget Reconciliation Act) by the county agencies. Paid cases totalled 45,407 or 2,628 (5.5%) fewer than February, 1982 and 10,158 (18.3%) below one year ago. The reduction was confined exclusively to the Regular and Unborn segments, with Regular down 2,326 (5.6%), Unborn Only off 350 (46.4%), and the Unborn Concurrent decreasing by 273 (60.9%). Only the Unemployed Parent segment registered an increase; this totalled 48 (0.9%) cases. Federal restrictions, for the most part, resulted in a loss of 5,725 (12.5%) cases since January as the table below shows.

Regular and Unborn
AFDC Case Load Change
between January and March, 1982

		Change From			
	March	February		January	
		#	%	#	%
Regular	39,380	-2,326	- 5.6%	-4,536	-10.3%
Unborn	579	- 623	-51.8%	-1,189	-67.3%
Total	39,959	-2,949	- 6.9%	-5,725	-12.5%

Net expenditures totalled $16,283,851 during March. This is a decline of $1,100,593 (6.3%) from February and $1,378,234 (7.8%) less than March, 1981. The expenditure reduction resulted primarily from fewer cases; however, an additional $147,534 in support collections was also influential. Federal restrictions appear to have lowered AFDC monthly expenditures by approximately $1.4 million as can be seen from the following table.

Regular and Unborn
AFDC Expenditure Change
between January and March, 1982

		Change From			
	March	February		January	
		#	%	#	%
Regular	$13,540,484.12	-$ 955,125	- 6.6%	-$1,131,428	- 7.7%
Unborn	$ 121,951.69	-$ 161,873	-57.0%	-$ 310,024	-71.8%
Total	$13,662,435.81	-$1,116,998	- 7.6%	-$1,441,451	- 9.5%

The following tables show the change in case load by type of county from March, 1981 and February, 1982 to March, 1982 for each AFDC segment.

Regular Segment

		Change From	
	March, 1982	February, 1982	March, 1981
State Total	39,380	-2,326 (-5.6%)	-9,386 (-19.2%)

Suburban	7,493	- 297 (-3.8%)	-2,181 (-22.5%)
Rural	11,722	- 426 (-3.5%)	-2,307 (-16.4%)

Unemployed Parent

		Change From	
	March, 1982	February, 1982	March, 1981
State Total	5,623	+48 (+0.9%)	+1,272 (+29.2%)
Urban	1,981	-46 (-2.3%)	+ 274 (+16.1%)
Suburban	1,233	+32 (+2.7%)	+ 283 (+29.8%)
Rural	2,409	+62 (+2.6%)	+ 715 (+42.2%)

Unborn Only

		Change From	
	March, 1982	February, 1982	March, 1981
State Total	404	-350 (-46.4%)	-970 (-70.6%)
Urban	124	-179 (-59.1%)	-614 (-83.2%)
Suburban	106	- 85 (-44.5%)	-172 (-61.9%)
Rural	174	- 86 (-33.1%)	-184 (-51.4%)

Unborn Concurrent

		Change From	
	March, 1982	February, 1982	March, 1981
State Total	175	-273 (-60.9%)	-534 (-75.3%)
Urban	87	-183 (-67.8%)	-290 (-76.9%)
Suburban	28	- 29 (-50.9%)	-106 (-79.1%)
Rural	60	- 61 (-50.4%)	-138 (-69.7%)

The following table compares the AFDC Program in the first quarter of calendar year 1982 with the first quarter of 1981. Active cases declined 12.9%, recipients 7.7%, and payments 3.4%.

AFDC
Families, Persons and Payments
Third Quarter Comparisons
Fiscal Years 1982 and 1981

	Monthly Average Cases January - March			Monthly Average Persons January - March			Total Payments January - March		
	F.Y. 1982	F.Y. 1981	Change	F.Y. 1982	F.Y. 1981	Change	F.Y. 1982	F.Y. 1981	Change
State Total	47,924	55,033	-7,109 (-12.9%)	138,036	149,576	-11,540 (- 7.7%)	$51,216,582	$52,998,442	-$1,781,860 (- 3.4%)

Unborn Concurrent	432	731	- 299 (-40.9%)	432	731	- 299 (-40.9%)	$ 112,119	$ 196,085	-$ 83,966 (-42.8%)

Approvals during March totalled 2,981. This was 228 (7.1%) fewer than February and 1,386 (31.7%) under March, 1981. The crises or deprivation resulting in approval in March, 1982 are quite similar to those one year ago. Continued absence of supporting or responsible parent, loss or reduction of employment of supporting parent, and reopenings as clients return eligibility review or fulfilled other program requirements accounted for 76.2% in March compared to 78.2% in March, 1981. Looking at quarterly performance, it is noted that approvals declined 10.3% compared to the same period last year. The decline occurred in new and transferred cases, whereas reopened cases advanced 9.5%. This is shown in the table below.

	Total Approvals January - March			New January - March		
	F.Y. 1982	F.Y. 1981	Change	F.Y. 1982	F.Y. 1981	Change
State Total	9,426	10,508	-1,082 (-10.3%)	3,868	5,176	-1,308 (-25.3%)
Urban	3,395	4,176	- 781 (-18.7%)	1,403	2,099	- 696 (-33.2%)
Suburban	2,657	2,958	- 301 (-10.2%)	930	1,233	- 303 (-24.6%)
Rural	3,374	3,374	--	1,535	1,844	- 309 (-16.8%)

	Reopened January - March			Transfers January - March		
	F.Y. 1982	F.Y. 1981	Change	F.Y. 1982	F.Y. 1981	Change
State Total	4,841	4,421	+ 420 (+ 9.5%)	717	911	- 194 (-21.3%)
Urban	1,799	1,844	- 45 (- 2.4%)	193	233	- 40 (-17.2%)
Suburban	1,430	1,334	+ 96 (+ 7.2%)	297	391	- 94 (-24.0%)
Rural	1,612	1,243	+ 369 (+29.7%)	227	287	- 60 (-20.9%)

Closings numbered 3,313 during the month, 1,874 (36.1%) below February's level but 70 (2.2%) more than one year ago. The number of closings mark a return to normal, following two months of higher activity induced by the implementation of federal eligibility restrictions. Closings outnumbered approvals by 332 (11.1%). For every case closed, there were 0.90 openings.

Emergency Assistance (EA) This assistance program advanced in all program indices--cases, recipients and expenditures--during March. This change was primarily the result of higher AFDC participation, up 92 families (16.8%). However, the "Other" (non-AFDC) segment also registered an increase, rising by 39 families (9.9%). Families served totalled 1,069 in March, 131 (14.0%) more than the previous month.

Recipients numbered 3,725 during March, 531 (16.6%) more than February and 53 (1.4%) greater than one year ago. Most of the recipient increase was concentrated in the emergencies of Utilities (up 472 persons or 46.5%) and No Employment (up 158 persons or 128.4%). Persons averaged 3.59 in the AFDC households versus 3.80 within the "Other" (non-AFDC) households.

January's expenditure of $312,270 represented an advance of $35,470 (12.8%) from February and was $6,274 (2.1%) more than March, 1981. The February to March change was due to higher expenditures in most of the emergency categories, particularly Utilities up $36,189 (51.2%) and No Employment up $14,592 (122.3%). However, this advance was partially mitigated by a $23,691 (18.7%) decline in Evictions. The increase in Utilities occurred across all county categories with the suburban counties showing a $14,680 (58.1%) growth, followed by the rural $13,016 (50.2%) and urban $8,492 (43.6%) counties. The No Employment emergency also advanced across all categories though unevenly, with suburban counties up $10,245 (1,014.4%) compared to $4,113 (51.8%) in the rural counties and $235 (7.9%) in the urban counties.

Vendor payments represented 84.7% of March's expenditures compared to 67.4% one year ago.

Minnesota Supplemental Aid (MSA) In March, the MSA Program displayed increases in the number of recipients and in expenditures. Expenditures set another record by shattering the million dollar mark.

Recipients numbered 10,160, 21 (0.2%) more than February's level, but 241 fewer than one year ago. The pattern of change was mixed, with the Aged category declining by five cases (0.2%) while the Blind and Disabled categories advanced by eight (5.1%) and 18 (5.4%) cases respectively. The growth in the Disabled category was caused by primarily a greater number of new cases in Itasca, Ramsey and Washington Counties. However, fewer refunds and cancellations also played a part.

Expenditures totalled $1,031,497. This was $50,697 (5.2%) greater than February and $69,453 more than last year. The urban counties all recorded higher payments--Ramsey +$14,767, Hennepin +$5,935 and St. Louis +$5,691. Their advance represented 52.1% of the monthly expenditure change. Most of the payment change occurred in the Disabled category, up $40,673 (5.4%). However, increases were also recorded by the Aged +$6,106 (2.8%) and Blind +$3,918 (29.6%) categories.

The average grant of $101.53 represents a new record, too. It was $4.79 (5.0%) higher than February and $9.04 (9.7%) greater than last year.

General Assistance (GA) The total number of persons receiving GA for March, 1982, was 8,283. This was 312 (3.6%) less than February, 1982, and 11,161 (57.4%) less than March, 1981. The average grant (gross dollars) per person for March, 1982, was $214.18. This was $16.64 (8.4%) more than February, 1982, and $52.46 (32.4%) more than March, 1981.

Application activity increased compared to February. The number of applications received was 27.0% higher and the total applications on hand increased by 21.1%. The number of applications disposed of increased by 23.3% to 3,238. Of these, 2,465 (76.1%) were approved.

The 2,465 cases added in March brought the total cases eligible to 8,581. This was an increase of 2.5% compared to February. Payments were made for 6,882 (80.2%) of the eligible cases. There were 2,236 cases closed which left 6,345 eligible cases continued to April.

The increase in GA for the winter of 1982, compared to the previous fall, is not as great as it has been in the past. The number of GA recipients was only 8.1% higher in the winter quarter (January through March) of 1982 than it was in the preceding fall quarter. This may be compared to the 11.6% average fall-to-winter increase for 1978 through 1980. Making the same comparisons by county subgroup shows that lower increases occurred in both the suburban and the rural groups but not in the urban county group.

Likewise, the average payment per person typically increases in the winter. The average fall-to-winter increase for 1978 through 1980 was 1.5%, but the average payment in the 1982 winter quarter decreased by 1.9% from the preceding fall quarter. There was a decrease in all three county subgroups in 1982 (urban, suburban and rural) with the urban county total showing the most disparity compared to the three prior years.

Medical Assistance (MA) Another monthly increase in the number of recipients raised the March level to 137,778. Relative to the February figure, this is 2,209 (1.6%) higher. Compared to last March, the increase was 3,592 (2.7%).

Expenditures during March were $60,793,260 and showed little change from February. The actual increase was 0.6%, due to some substantial offsetting changes. Since March payments are for February's utilization of nursing home and institutional care (28 days), those components decreased by $3.7 million in the month-to-month comparison. Simultaneously, increases of $2.4 million for Inpatient Hospital Care and $0.7 million for Physician Services resulted from increased utilization in those areas. The remaining offset resulted as $0.7 million less was generated from Recipient Recoveries.

The average monthly expenditure per recipient was down 1.0% from last month. The decline of $4.55 left an average of $441.24. This was 18.2% higher than last March, an increase of $69.96 compared to one year ago.

With nine months of the State Fiscal Year over, expenditures are running 15.4% ahead of the same period last year. The following table shows a comparison of the service categories that increased at faster rates than the overall total.

Medical Assistance Expenditures
for Selected Categories of Service
July '81 - March '82 vs. July '80 - March '81

Category	1981-82	1980-81	Percent Increase
MA Total	$541,572,694	$469,135,623	15.4%
Nursing Home, Skilled	169,447,714	141,848,980	19.5
Inpatient Hospital	74,719,839	61,719,122	21.1
Nursing Home, ICF-MR	48,878,643	36,204,659	35.0
Nursing Services	2,251,470	1,386,676	62.4
Psychology	1,851,792	1,120,886	65.2
EPSDT	557,197	452,946	23.0
Occupational Therapy	$ 73,206	$ 19,683	271.9%

(1) This table represents state Medicaid system payments plus payments made by counties to primarily medical vendors not covered by the central payments system. Also, in this table, each person is counted under all service categories for which payment is made in his/her behalf during the month.

(2) Recipient recoveries represent collections such as estate settlements, tort recoveries, etc. ... generally third party collections which cannot be tied directly to a specific service billing. The dollar values under this category are always negative.

(3) An additional $3,035 was paid out for EPSDT services during the month; however, these charges were billed in a different fashion and are included under other service types such as Public Health Clinic, Physician/Osteopathic Services, etc. Existing reports do not break these charges out separately.

**Includes Lincoln, Lyon and Murray Counties.
***Includes Faribault, Martin and Watonwan Counties.

TECHNICAL NOTES

Table I	Application activity for the AFDC Program does not include applications for medical only needs.
Table II	Under MA, total Persons Concurrently Receiving AFDC are not included when calculating the total number of persons receiving assistance. This is done to unduplicate the total count since these people are already counted under the AFDC Program.
Table III	This table does not include cases and payments made under the Emergency Assistance Program.
Table IV	The sixteen (16) counties identified by the Census Bureau as metropolitan (i.e.; SMSA) are separated into urban and suburban. The urban counties are Hennepin, Ramsey, and St. Louis, and the suburban counties are the thirteen (13) other SMSA counties. These counties are noted (U) and (S) respectively. Two multi-county agencies are labelled as follows: F-M-W HSB includes Faribault, Martin, and Watonwan Counties; Region VIII North includes Lincoln, Lyon, and Murray Counties.
Tables V & VI	The Medical Assistance Program is broken into two components: (1) Those recipients who had a vendor payment made in their behalf and are not concurrently receiving a money payment (the MA-Only group). (2) Those recipients who are concurrently receiving a money payment (AFDC, SSI, MSA) and a medical vendor payment was also made in their behalf. The counts are of people in whose behalf a payment was made out of the State's Centralized Medical Payments System during the month specified.

GLOSSARY

AFDC-UB	AFDC UB . . . An unborn child is included under the definition of child in the AFDC Program and grants are determined accordingly. For this reason, we have counted them as recipients. It is possible for a case which is currently receiving money under another subprogram (such as Unemployed Father or Regular AFDC) to receive an additional amount due to the presence of an unborn child. In instances such as this, the unborn will appear in the child count, but there will be no case or caretaker count since they are carried under the other subprogram.
EPSDT	Early Periodic Screening and Diagnostic Treatment
GAMC	General Assistance Medical Care
HMO	Health Maintenance Organization
Nursing Home ICF-I	Intermediate Care Facility (High Care)
ICF-II	Intermediate Care Facility (Minimum Care)
ICF-MR	Intermediate Care Facility (Mentally Retarded)
OAA-CCR	Old Age Assistance Concurrently Receiving Supplemental Security Income
OAA-MAO	Old Age Assistance, Medical Assistance Only
P.T., O.T., S.T. Audiology in Nursing Home	Physical Therapy, Occupational Therapy, Speech Therapy
Podiatrist Service	Specializing in Foot Care Services
State Institution MR (ICF)	Mentally Retarded, Intermediate Care Facility
SMSA	Standard Metropolitan Statistical Area is a county or a group of contiguous counties which contain at least one city of 50,000 population. In addition to the county of counties containing such cities, contiguous counties are included in such areas if they are essentially metropolitan in character and are socially and economically integrated.

TECHNICAL NOTES 28

GLOSSARY 29

April, 1982 in Summary

All Programs Expenditures totalled $84,160,045 during April. This was $3,965,110 (4.9%) higher than March and resulted from higher payments for nursing home and institutional care because of more days of care provided in March than in February and from an increase in inpatient hospital utilization. The expenditure increase would have been even more pronounced had it not been curtailed by higher MA recipient recoveries and by lower AFDC maintenance costs. The annual trend in expenditures, up $6,183,145, was influenced primarily by higher MA costs and bolstered by greater MA recipient utilization. Lower AFDC (-$2,003,704) and GA (-$1,257,155) expenditures, however, partially offset the MA advance and held the annual change to 7.9%.

Recipients numbered 205,079 during April, virtually unchanged from the previous month. The annual comparison shows a different picture, with recipients down by 29,704 (12.6%). Forty-seven percent (47%) of this annual decrease is due to the decline in AFDC recipients since January, 1982 (-13,605). The balance of the decrease is attributable to changes in General Assistance and AFDC eligibility which were effective in July and August, 1981.

Aid to Families with Dependent Children (AFDC) All facets of the AFDC Program registered declines in April, 1982. This represents the third successive month of contraction which is in marked contrast to the fluctuation experienced in the previous nine months. The federal and state restrictions in AFDC eligibility, in conjunction with court orders reversing or delaying implementation of these changes, were primarily responsible for the unusual trend of the past year.

Expenditures during the month totalled $15,874,276. This was $409,574 (2.5%) less than March and $2,003,703 (11.2%) below last year. Expenditures are at their lowest level since June, 1980. The reduction in costs from March can be attributed to a decline in supplemental payments of $190,775, an increase in support collections of $155,056 in addition to fewer cases paid, which saved an estimated $60,000. Lower costs were dispersed throughout all program segments and county types. The Regular segment alone exhibited a mixed pattern, marked by a slight case load increase and lower payments. Here, the number of cases increased by 71 while expenditures diminished by $252,462. This inverse relationship resulted from a reduction in supplemental payments of nearly $166,000 and an increase of approximately $125,000 in support collections.

April's cases totalled 45,235. This represents a decrease of 172 (0.4%) from March, 1982 and is 10,776 (19.2%) fewer than April, 1981. Cases are now at the lowest level since November, 1976. The monthly decline was not broadly based, occurring entirely within the Unemployed Parent and Unborn segments. Unemployed Parent cases dropped 142 (2.5%) to 5,481. The loss was concentrated within the rural counties, off 93 cases (65.5%), but was bolstered by the urban, off 41 (28.9%) and suburban counties, down eight cases (5.6%). The other category of change, the Unborn Only cases, sustained a proportionately greater loss, falling 101 (25.0%) cases from March to 303. This was 1,057 (77.7%) cases less than April, 1981. The change within the Unborn Only category was focused in the urban (-34.9%) and suburban (-34.0%) counties with a reduction of only 16.1% occurring in the rural counties. The Unborn Concurrent segment totalled 83 cases during the month, a reduction of 92 (52.7%) cases compared to March, 1982 and 649 (88.7%) lower than one year ago. Within this segment, losses were evident in all county categories. Of the 83 paid cases, 39 (47.0%) were urban, 37 (44.6%) were rural and seven (8.4%) were suburban.

Approvals during the month numbered 2,902, 79 (2.7%) fewer than March and 383 (11.7%) under the level of one year ago. Reopened cases comprised 1,454 (50.1%) of all openings in comparison to 1,526 (51.2%) in March, 1982 and 1,464 (44.6%) in April, 1981. April, 1981 is noteworthy because it represents a point of change in the composition of the AFDC approvals. Prior to April, 1981, new cases predominated while after this date reopened cases became the most numerous. Of the total cases approved, 36.5% were urban, 36.1% rural and 27.4% suburban. Approximately the same percentages prevailed in March, 1982.

There were 412 (12.4%) fewer closings than in March, 1982 and 184 (6.0%) less than in April, 1981. Closings totalled 2,901, only one less than approved.

Emergency Assistance (EA) This program advanced during April as a result of greater activity in the category of Utilities. This occurred because needy families were attempting to erase outstanding bills which accumulated during the heating season. They were prompted by impending electrical cutoff, which could legally occur after April 1.

There were 4,639 persons aided during the month. This was 914 (24.5%) more than March and 346 (8.1%) greater than one year ago. The emergency of Utilities alone represented 2,682 persons or 57.8% of all those served. The number of recipients in this category alone rose by 1,194 (80.2%) from March; however, its impact was partially offset by declines in the category of Evictions.

Cases totalled 1,290 during April. This was 221 (2[illegible].7%) greater than March but only 26 (2.1%) more than last year.

Costs incurred by the county agencies totalled $399,674. This was 87,404 (28.0%) higher than the March level and 53,377 (15.4%) more than one year ago.

The two major emergencies during April were Utilities and Eviction. Evictions, though normally in first place, occupied second during March and April. The advance of the Utility category in April was no surprise, having occurred in 1979 and 1981. However, the strength of the change in this category from $106,858 to $234,684, or 219.6%, should be noted. Also, the Utility emergency within the October to April period cost $702,470 compared to $421,307 for the previous heating season.

The following table shows the changes in Utility costs between March and April, 1982. While the advance is evident across all county categories, the greatest change occurred within the urban counties. This category demonstrated a 278.2% increase from the previous month led by Ramsey County, which rose 323.4% in this one-month period.

Utility Emergency
by County Category
April, 1982 and March, 1982 Compared

Category	Cases April	Cases March	Change #	Change %	Payments April	Payments March	Change #	Change %
Urban	273	83	190	228.9%	$105,799	$ 27,978	$ 77,821	278.2%
Hennepin	87	32	55	171.9	36,936	11,029	25,907	234.9
Ramsey	161	39	122	312.8	61,985	14,641	47,344	323.4
St. Louis	25	12	13	108.3	6,878	2,308	4,570	198.0
Suburban	225	129	96	74.4	70,265	39,938	30,327	75.9
Rural	203	183	20	10.9	58,620	38,941	19,679	50.5
Total	701	395	306	77.5%	$234,684	$106,857	$127,827	120.8%

The advance in utility costs had an additional aspect. The costs within the urban counties were extended primarily to AFDC families, while in the suburban and rural counties, the non-AFDC ("Other") families predominated. This can be seen in the table below.

Utility Costs by Type of County
April, 1982 and March, 1982 Compared

	AFDC		Other		State	
	April	March	April	March	April	March
Urban	$ 76,541	$21,006	$ 29,258	$ 6,973	$105,799	$ 27,978
Suburban	30,076	14,655	40,190	25,283	70,265	39,938
Rural	23,307	16,747	35,312	22,194	58,620	38,941
State	$129,924	$52,408	$104,760	$54,450	$234,684	$106,857

Minnesota Supplemental Aid (MSA) During April, 10,196 aged, blind and disabled persons received assistance. This was 36 (0.4%) higher than March but 269 (2.6%) fewer than one year ago. The change occurred primarily within the Disabled category and was concentrated in Anoka (+8), Hennepin (+21), Martin (+15) and Waseca (+9). Higher numbers of current and initial cases plus fewer refunds and cancellations contributed to the increase. Also, the practice of making quarterly payments to board and care recipients for personal needs as in Waseca County helped bolster the advance.

Expenditures totalled $1,018,232, the second highest payment on record. April's cost was $13,265 (1.3%) lower than the previous month but $67,201 ahead of April, 1981. The monthly expenditure change occurred within the Disabled category and was focused within the urban counties. Lower corrective payments during April in Hennepin County contributed to a decline of $25,102 between the two months. This was partially offset by a $5,146 advance in Special Needs payments but was not sufficient to counter the change. Ramsey County experienced a reduction of $6,374 within the Disabled category, but this was cancelled by a $6,126 increase in St. Louis County.

General Assistance (GA) The total number of persons receiving GA for April, 1982, was 8,388. This was 105 (1.3%) more than March, 1982, and 10,615 (55.9%) less than April, 1981. The average grant (gross dollars) per person for April, 1982, was $215.28. This was $1.10 (0.5%) more than March, 1982, and $54.10 (33.6%) more than April, 1981.

Application activity decreased compared to March. The number of applications received was 17.6% lower and the total applications on hand decreased by 16.0%. The number of applications disposed of decreased by 17.7% to 2,665. Of these, 2,084 (78.2%) were approved.

The 2,084 cases added in April brought the total cases eligible to 8,429. This was a decrease of 1.8% compared to March. Payments were made for 6,812 (80.8%) of the eligible cases. There were 1,976 cases closed which left 6,453 eligible cases continued to May.

A new phenomenon has occurred in GA participation. The number of recipients has increased from March to April. The trend in prior years has been irregular decreases in monthly total recipients from February through June. This year's increase occurred in the urban and rural counties; recipient totals decreased slightly in the suburban counties. This month's increase in GA recipients also exhibits an anticipated departure from the state's unemployment trend. Unemployment has dropped off from a high in March while GA recipient totals reached a relative high in February. This departure was anticipated because the present GA program has virtually no labor market attachment, i.e., in order to be eligible for GA, a recipient must have a substantial barrier to employment.

Medical Assistance (MA) Recipients of MA during April were 0.6% lower in number than in March. The monthly total of 136,979 was 0.5% higher than last April.

Expenditures exhibited substantial increases for the same time periods, resulting in a total of $65,062,092. The increase of 7.0% from March was equivalent to a net gain of $4.3 million. Higher payments for nursing homes and institutional care were made this month, since they covered the 31 days of March, while March payments were made for 28 days in February. This amounted to $4.9 million. Furthermore, utilization of Inpatient Hospital care rose $0.9 million. This $5.8 million difference was reduced by a high level of Recipient Recoveries, some $1.4 million more than last month. These changes account for nearly all of the month-to-month difference.

Comparing expenditures to one year ago shows a 16.7% increase, largely due to inflation of medical costs, but there was also greater utilization per recipient, most notably in Rehabilitation Services, Occupational Therapy, and Ambulance/Medical Transportation. Overall, the utilization per recipient increased only 1.4%. The average expenditure per recipient was $474.98 during April, an increase of 7.6% from the prior month. The average expenditure rose 16.1% from one year ago.

Nursing Home Payments Payments to nursing homes, not including state institutions, have long been a substantial portion of MA expenditures. Since 1978, they have constituted a growing majority of MA expenditures. The following table shows how they have increased year by year as a proportion of total expenditures:

Medical Assistance Expenditures
Total Compared to Nursing Home Per Diem Payments
Excluding State Institutions
Calendar Years 1975-1981
(in Thousands)

Year	Total	% Change from Prior Year	Nursing Home Per Diem Payments	% of Total	% Change from Prior Year
1975	$287,395	--	$128,875	44.84	--
1976	328,277	14.23	157,771	48.06	22.42
1977	394,821	20.27	191,022	48.38	21.08
1978	438,269	11.00	230,009	52.48	20.41
1979	518,568	18.32	271,976	52.45	18.25
1980	600,400	15.78	330,391	55.03	21.48
1981	$706,463	17.67	$399,758	56.59	21.00

Increased nursing home payments are due primarily to inflation in the cost of nursing home care, and to a lesser extent to an increased number of recipients in nursing homes. The following table illustrates changes in these two factors:

Year	Nursing Home Per Diem Payments (Thousands)	Average Monthly Nursing Home Recipients	% Change from Prior Year	Average Monthly Cost Per Recipient	% Change from Prior Year
1975	$128,875	27,120	--	$ 365.54	--
1976	157,771	27,238	0.44	482.69	32.05
1977	191,022	28,108	3.19	566.34	17.33
1978	230,009	29,349	4.42	653.08	15.32
1979	271,976	29,610	0.89	765.44	17.20
1980	330,391	31,187	5.33	882.81	15.33
1981	$399,758	32,381	3.83	$1,028.80	16.54

(1)This table represents state Medicaid system payments plus payments made by counties to primarily medical vendors not covered by the central payments system. Also, in this table, each person is counted under all service categories for which payment is made in his/her behalf during the month.

(2)Recipient recoveries represent collections such as estate settlements, tort recoveries, etc. ... generally third party collections which cannot be tied directly to a specific service billing. The dollar values under this category are always negative.

(3)An additional $5,529 was paid out for EPSDT services during the month; however, these charges were billed in a different fashion and are included under other service types such as Public Health Clinic, Physician/Osteopathic Services, etc. Existing reports do not break these charges out separately.

*May not add due to rounding.
**Includes Lincoln, Lyon and Murray Counties.
***Includes Faribault, Martin and Watonwan Counties.

TECHNICAL NOTES

Table I Application activity for the AFDC Program does not include applications for medical only needs.

Table II Under MA, total Persons Concurrently Receiving AFDC are not included when calculating the total number of persons receiving assistance. This is done to unduplicate the total count since these people are already counted under the AFDC Program.

Table III This table does not include cases and payments made under the Emergency Assistance Program.

Table IV The sixteen (16) counties identified by the Census Bureau as metropolitan (i.e.; SMSA) are separated into urban and suburban. The urban counties are Hennepin, Ramsey, and St. Louis, and the suburban counties are the thirteen (13) other SMSA counties. These counties are noted (U) and (S) respectively.

Two multi-county agencies are labelled as follows: F-M-W HSB includes Faribault, Martin, and Watonwan Counties; Region VIII North includes Lincoln, Lyon, and Murray Counties.

Tables V & VI The Medical Assistance Program is broken into two components:

(1) Those recipients who had a vendor payment made in their behalf and are not concurrently receiving a money payment (the MA-Only group).

(2) Those recipients who are concurrently receiving a money payment (AFDC, SSI, MSA) and a medical vendor payment was also made in their behalf.

The counts are of people in whose behalf a payment was made out of the State's Centralized Medical Payments System during the month specified.

GLOSSARY

AFDC-UB	AFDC UB . . . An unborn child is included under the definition of child in the AFDC Program and grants are determined accordingly. For this reason, we have counted them as recipients. It is possible for a case which is currently receiving money under another subprogram (such as Unemployed Father or Regular AFDC) to receive an additional amount due to the presence of an unborn child. In instances such as this, the unborn will appear in the child count, but there will be no case or caretaker count since they are carried under the other subprogram.
EPSDT	Early Periodic Screening and Diagnostic Treatment
GAMC	General Assistance Medical Care
HMO	Health Maintenance Organization
Nursing Home ICF-I	Intermediate Care Facility (High Care)
ICF-II	Intermediate Care Facility (Minimum Care)
ICF-MR	Intermediate Care Facility (Mentally Retarded)
OAA-CCR	Old Age Assistance Concurrently Receiving Supplemental Security Income
OAA-MAO	Old Age Assistance, Medical Assistance Only
P.T., O.T., S.T. Audiology in Nursing Home	Physical Therapy, Occupational Therapy, Speech Therapy
Podiatrist Service	Specializing in Foot Care Services
State Institution MR (ICF)	Mentally Retarded, Intermediate Care Facility
SMSA	Standard Metropolitan Statistical Area is a county or a group of contiguous counties which contain at least one city of 50,000 population. In addition to the county of counties containing such cities, contiguous counties are included in such areas if they are essentially metropolitan in character and are socially and economically integrated.
TB	Tuberculosis
